DEC 17 1923

PREFACE.

ARNOLD AND SONS in presenting to the Profession the New Edition of their Illustrated Catalogue of Surgical Instruments and appliances, take the opportunity of tendering their thanks for the liberal support they have received during the last sixty years, and trust that by still continuing to produce Instruments, &c., of the very best construction, quality and finish, to merit a continuance of that patronage hitherto accorded them.

All Instruments are manufactured on the premises under Arnold and Sons' *personal* superintendence, thus enabling them to *guarantee* the quality of every article purchased.

The prices affixed are extremely moderate taking into account the superior workmanship, and will bear a favourable comparison with other published lists; if, in some few cases they be slightly in excess, it is because it is found to be impossible to produce Instruments at a lower rate, if the quality be *guaranteed*.

Arnold and Sons have for some years made Orthopædic Instruments their *specialité*, and have devoted considerable time and attention to the production of appliances, remarkable not only for their effective ingenuity, but also for their extreme lightness, the latter quality being so highly essential in all cases requiring mechanical assistance.

Orders from abroad must either be accompanied by a

remittance or an order for payment in London, and Arnold and Sons request that, when orders are sent through an agent, it be distinctly stated that the Instruments are to be obtained *direct* from them, as many articles of inferior quality are frequently represented as their manufacture.

Every instrument is stamped "Arnold and Sons, London."

Arnold and Sons, for the convenience of their friends, have made special arrangements with the various firms mentioned at the end of catalogue to supply articles at manufacturers' prices ; and any goods not enumerated in this Catalogue required by customers abroad will be procured for them, on advantageous terms, a commission of five per cent. on the amount expended being the sole charge.

Satisfactory London references required previous to opening new accounts. Cheques to be crossed Bank of England, and Post-Office Orders to be made payable at Chief Office.

35 & 36, WEST SMITHFIELD,
LONDON, E.C.

January, 1873.

Do. Wool	191	Dilators, Lithotomy	59
Cotton's Throat Forceps	81	Do. Rectum	139
Do. Tongue Depressors	80	Do. Stricture	141, 142
Coulson's Caustic Catheters	67	Do. Os Uteri, Barnes'	35
Coxeter's Bullet Extractors	18	Do. Fluid	158
Cradles, Fracture	121, 122	Do. Uterine	157
Craniotomy Forceps	31-33	Directors	44, 54, 57, 139, 140
Crimean Splints	121	Do. Hernia	38
Cripp's Skin-grafting Scissors	189	Do. Silver, Brodie's	37
Critchett's Directors	54	Disarticulated Human Skeletons	184
Do. Ophthalmoscopes	56	Do. Head	184
Do. Strabismus Scissors	57	Dislocation Pulleys	122
Do. Knives	57	Dispensing Scales and Weights	191
Do. Eye-lid Retractors	54	Dissecting and Post-mortem Instruments	48-50
Crotchets and Blunt Hooks	30	Do. Forceps	50
Crotchets	33	Do. Hooks	50
Crutches, Leg Irons, Arm Slings, &c.	117-119	Dixon's Knives	57
Curettes and Cystotomes (Graefe's)	54	Dubell's Stethoscopes	75
Do. and Hooks	54	Domett Bandages	123
Do. Tilt's Uterine	163	Double-curve Scissors	162
Cupping Bottles	64	Do. Bistourys	43
Do. Glasses	64	Do. Channel Catheters	59
Do. Instruments	63, 64	Do. do. do. Plated	70
Do. Lamps	64	Do. do. do.	67-70
Curling's Speculum Ani	129	Do. Hooks	54
Curtis's Hearing Trumpet	167	Douche, Barth's	147
Curved Scissors	38	Do. Heath's Syphon	167
Cushions and Beds, Air	178	Do. Lund's Ear	166
Do. Water	179	Do. Syphon	163
Cusco's Speculum Vagina	127		

Douche, Uterine	147	Etiolle's Instrument for the Urethra ...	61
Drainage Tubing, India-rubber ...	189	Eustachian Catheters	165
Do. Tubes, Wire	189	Evan's Vaccinatory Instruments ...	189
Dressing Forceps	44	Excavating Instruments	86, 98, 99
Do. Scissors	46	Excising Forceps	96
Drills (Rose-head), Dental	100	Excision Saws	172
Duck-bill Speculums	128	Do. Splints	120
Duckworth's Stethoscopes	74	Expanders, Chest	138
Duffin's Pessaries	73	Exploring Needles	38-41
Dumb Bells	138	Do. Syringes	189
Durham's Urethral Syringes	169	Do. Trocars	44, 103, 161
Ear and Nose Instruments	164	Eye-ball Hooks	54
Do. Channels	167	Do. Douches and Fountains	54
Do. Douches	166	Do. Drop Bottles, Chalk's	54
Do. Forceps	165, 166	Do. Instruments, in Cases	51-53
Do. Scoops	166	Do. lid Compressors	55, 56
Do. Speculums	129, 130, 164	Do. lid Retractors	54
Do. Syringes	166	Do. Pieces for Microscopes	182
Earthenware Inhalers	132	Do. Shades	54
Do. Urinals	124, 125	Do. Syringes	53, 54
Ebonite Pulverizers	134	Do. Syringes, Anel's	53
Eclectic Inhalers, Bullock & Reynolds' ...	132	Eyes, Artificial	114
Economising Nitrous Oxide Apparatus ...	137	Face-pieces (Nitrous Oxide)	135, 137
Ecraseurs	64, 65	Facilis, Enema, Arnold's Patent ...	144
Edward's Stethoscopes	75	Farr's Midwifery Forceps	23
Do. Economising Apparatus	136	Faulding's Vapour Baths	131
Eguisier's Irrigators	145	Feeding Apparatus, Paley's	190
Eighteen-tailed Bandages	123	Do. Bottles	35, 190
Elastic Anklets	111	Do. do. Mather's	190
Do. Cotton Net Bandages	123	Do. do. O'Connor's	190
Do. Enemas	168	Feet on Catgut	185
Do. Gum Bougies	71	Do. Water Bottles	180
Do. Gum Catheters	66	Female Catheters	34, 35, 45, 66, 67, 70
Do. Gum Pessaries	73	Do. Pelvis	185
Do. Gum Rectum Plugs	190	Do. Staffs	59
Do. Hydrocele Syringes	169	Do. Syringes	172, 173
Do. Knee Caps	111	Do. Urinals	125
Do. Stockings	110, 111	Fenestrated Tumour Forceps	164
Do. Urethral Syringes	169	Do. do. Excision Splints	120
Elbow Splints	120	Do. do. Splints	121, 122
Electric Chain Bands	178	Ferguson's Bone Forceps	172
Electro-Magneto-Machines	173, 174	Do. Calculus Extractors	59
Elevators	101, 172	Do. Hernia Instrument	139
Elliotson's Stethoscopes	75	Do. Leg and Thigh Splints	120
Ellis's Caustic Holders	161	Do. Lion Forceps	172
Do. Dilators	157	Do. Lithotomy Knives	61
Do. Splints for Fractured Clavicle ...	122	Do. Lithotrites	59
Endoscopes	188	Do. Needles	83
Enemas, Arnold's Brass	173	Do. Palate Knives	83
Do. Arnold's Portable	146, 147	Do. Patella Splints	122
Do. Children's	169	Do. Stethoscopes	74
Do. Elastic	168	Do. Vagina Speculum	128, 129
Do. Patent Facilis and Simplex ...	144	Field Panniers (Hospital)	16
Do. Stomach Pumps, &c.	142-146	Do. Tourniquets	20
Do. Syphons	146, 147	Filters, Lipscomb's	191
Entomological Instruments	186	Do. Atkins'	191
Entropium Forceps	54	Finger Knives	38, 44, 45
Epistaxis Canulas	168	Do. Saws	17, 45
Erichsen's Catheters	59-67	Do. Stalls	191
Do. Hollow Sounds	60	Fireman's Respirators	192
Do. Lithotomy Knives	60	Fistula Directors	140
Do. Tonsil Scissors	79-83	Do. Knives	140
Do. Lithotomy Scoops	61	Do. Probes	140
Do. Trocars	104	Do. Scissors	140
Ether Spray Apparatus, Richardson's ...	134	Flannel Lithotomy Bandages	61
		Do. Roller Bandages	123

Flexible Conversation Tubes	167	Forceps, Vulsellum	81, 163
Do. Uterine Stems	161	Do. Wathen's Starch Bandage	189
Fluid Dilators, Ashtou's	139	Do. Webber's Anti-ligature... ..	17
Do. Urethral Dilators	158	Do. Wilde's Ear	166
Folder's Powder	190	Fracture Splints, Liston's... ..	120

DEC 17 1923

A CATALOGUE OF SURGICAL INSTRUMENTS.

ARNOLD & SONS' SURGICAL BAG
REGISTERED,
AS SUGGESTED BY MR. BARNARD HOLT.

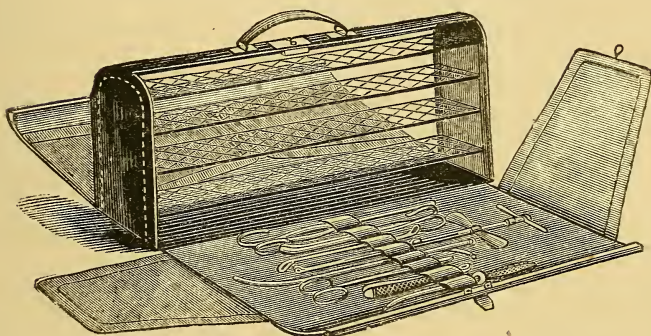

FIG. 1.

FIG. 2.

The surgical bag as Fig. 1 open, which shows a series of wire trays fitted in the central portion of the bag for cases, &c., and the two

sides or flaps, with loops for lithotrites, catheters, &c. The bag contains—(1) A case containing two amputating knives, butcher's amputating saw, and catlin. (2) A case containing three scalpels, two curved bistouries, a hernia knife, two lithotomy knives, two harelip or tenotomy knives, probe, sharp-pointed pair of scissors, pair of artery forceps or tenaculum, pair of spring forceps, aneurism, needle, double hook, and hernia director. (3) A case containing three cataract knives, Tyrrell's hook, four needles, silver curette and hook, Adams' eyelid retractor, set of Bowman's probes, Critchett's fine groove director, pair of cilia forceps, pair of iris forceps, and two pairs of scissors. (4) Case containing complete set of Holt's dilators. (5) Tonsil guillotine in case. (6) Ophthalmoscope and laryngoscope combined in case. (7) A pocket case containing gum lancet, Syme's knife, finger knife, scalpel, dressing forceps, pair of scissors, silver caustic case, silver female catheter, probe, director, needles, exploring trocar, &c. (8) A case containing hydrocele trocar, trocar for paracentesis, half-ounce glass syringe with platinum point, and small bottle. (9) A case containing gum elastic catheters, Holt's india-rubber winged catheters, folding needle-case. (10) A case for hare-lip pins, acupressure needles, probes, &c. (11) A hypodermic syringe in case. (12) Small chloroform bottle in wood case. On the two sides of the bag:—

Two lithotrites, silver double channel catheter; three short-beaked sounds, prostate catheter, five silver catheters (Nos. 1, 2, 3, 8, and 10), Pontean's curved trocar for puncturing the bladder, folding rectum speculum, vagina speculum, probang, clinical thermometer, polypus forceps, epistaxis catheter, Arnold's ecraseur, tooth forceps, tracheotomy tubes, rectum bougies, lithotomy forceps, lithotomy scoops, lithotomy staffs, tourniquet, &c.

Fig. 1 represents the Bag when open.

Fig. 2, the Bag (Morocco) when closed, size $18 \times 5\frac{1}{4} \times 9\frac{1}{2}$.

Complete with instruments as above	50 guineas.
Bag and wire trays (without instruments)	3 guineas.

The instruments can be varied to suit the requirements of the surgeon.

Extract from the *Lancet*, April 22nd, 1871:—"The Bag is perfectly portable, and is of a size not to offend the eye, or be inconvenient to carry. In this *multum in parvo* there is almost everything that can be required in military or civil practice."

Extract from *Medical Times and Gazette*, May 13th, 1871:—"Thus the surgeon, if he desires to take with him merely some small case that will go into his pocket, can readily do so. On the other hand, should he be summoned to a railway smash, or go suddenly on foreign or military service, he has but to snatch up the Bag, and there, ready packed, he will find instruments for every disease or injury requiring operation."

Extract from *Medical Press and Circular*, May 31st, 1871:—"Here is a more compact contrivance than any yet submitted to surgeons. The interior of the Bag is so arranged that any instrument can be at once selected without disturbing the rest."

Mr. Barnard Holt writes:—"For some years I have felt the desirability of possessing a convenient Surgical Bag, capable of containing not only instruments required for any surgical emergency, but also those that are in daily use. The difficulty hitherto has been of two kinds—namely, the size of the bag and the facility of readily finding the instruments you require. Dr. Greenhalgh has fitted one of Arnold & Sons' Registered Bags for obstetric purposes, and I have, after some thought, suggested to Mr. James Arnold, of West Smithfield, who is the inventor of the Bag, an interior arrangement by which every instrument can be immediately selected without disturbing the rest."

AMPUTATING INSTRUMENTS.

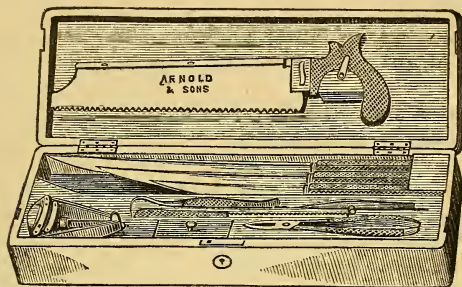

FIG. 3.

Morocco case, containing—

Large Fergusson's Amputating Knife.

Medium ditto ditto.

Small ditto ditto.

The case as above £1 10 0

A Mahogany case, containing—

Large Liston's Amputating Knife for the flap operation.

Medium ditto ditto ditto.

Small ditto ditto ditto.

Large Circular ditto ditto.

Catlin.

In chequered ebony handles, complete £2 7 6

A Mahogany case lined with velvet, as Fig. 3, containing—

Liston's Amputating Knife, Large, for the flap operation.

Ditto ditto Small ditto

Catlin.

Large Amputating Saw.

Finger Saw.

Liston's Artery Forceps.
 Bone Forceps, Liston's.
 Petit's Screw Tourniquet.
 Six Needles and Silk.

In chequered ebony handles, complete . . . £4 0 0

A handsome Mahogany case, brass-bound and lined with silk velvet, containing—

Large Liston's Amputating Knife for the flap operation.
 Small ditto ditto ditto.
 Catlin.
 Best Large Amputating Saw.
 Finger Saw.
 Luer's Artery Forceps.
 Liston's Bone Forceps, circular joints.
 Petit's Best Spiral Tourniquet.
 Spring Forceps.
 Straight Scissors, strong.
 Six Needles and Silk.

In chequered ebony handles, complete . . . £5 5 0

A very superior and complete set, in a Mahogany case, brass-bound and lined with silk velvet throughout (or the wood polished inside), containing—

Large Liston's Amputating Knife for the flap operation.
 Medium ditto ditto ditto.
 Small ditto ditto ditto.
 Circular ditto ditto.
 Catlin.
 Luer's Improved Artery Forceps.
 Large Amputating Saw with solid shoulders.
 Metacarpal Saw.
 Fergusson's Bone Forceps, circular joints.
 Four Operating Scalpels.
 Straight Scissors, extra strong.
 Two Petit's Spiral Tourniquets.
 Six Needles and two Tablets of Arnold and Son's Improved
 Ligature Silk.

In chequered ebony handles, complete . . . £6 10 0

Keith's Portable Field Case (size 11 in. \times 2 \times 3½), containing—

Amputation Saw, jointed back, and spare blade. One Amputating Knife, and two smaller blades, fitting into a spring socket handle. Bullet Extractor. Four Dieffenbach's Forceps. Strong Bistoury. Luer's Artery Forceps. Operating Forceps. Acupressure Pins, Needles, &c.

The set complete £4 12 6

ARMY REGULATION CASE.

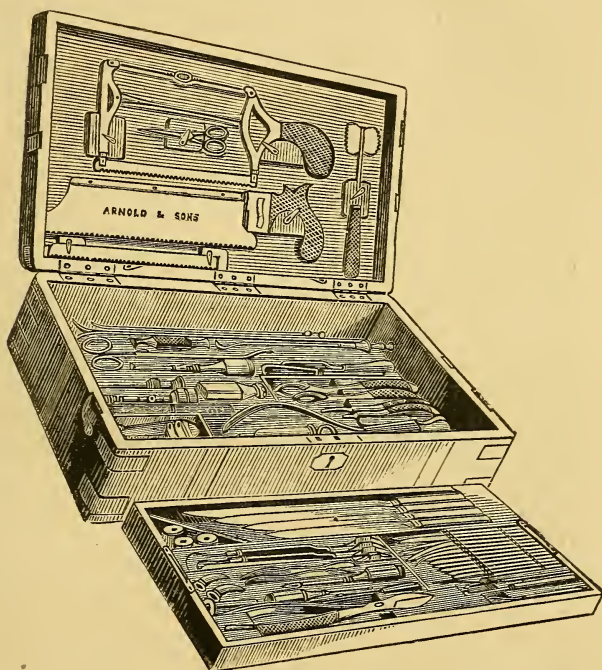

FIG. 4.

In accordance with the Army Regulations.

A superior handsome Mahogany brass-bound case, lined with silk velvet, containing—

Four Amputating Knives.
Best Large Amputating Saw.

Butcher's Amputating Saw, for excisions.
 Liston's Bone Forceps.
 Syme's Artery Forceps and Liston's Artery Forceps.
 Four Pairs Dieffenbach's Artery Forceps.
 Two Trephines, small and medium.
 Elevators, square-pointed.
 Strong Straight Scissors.
 Hey's Skull Saw and Raspitory.
 Straight Gouge and Gouge Forceps.
 Pair Necrosis Forceps.
 Fergusson's Clawed or Lion Forceps.
 Pair Dissecting or Spring Forceps.
 Six Operating Scalpels, Strong scale-tanged Scalpel.
 Two Curved Bistouries, one each probe and sharp-pointed.
 Three Straight Bistouries, two sharp and one probe-pointed.
 Tenaculum and Aneurism Needle.
 Hernia Knife or Bistoury.
 Hernia Director and Silver Director.
 Large Trocar and Canula for Paracentesis Abdominis.
 Hydrocele Trocar and Silver Canula.
 Hydrocele Syringe, with palladium point.
 Small Exploring Trocar, with Silver Canula.
 Liston's Nævi Needle.
 Improved Bullet Forceps, with moveable blades.
 Bullet Extractor.
 Two Silver Trachea-Tubes and Canulas.
 Long Silver Gun-shot Probe.
 Four elastic gum web Male Catheters, Nos. 1, 3, 5, 7.
 Three Silver Male Catheters, hall-marked, Nos. 2, 4, and 6.
 Silver Female Catheter, hall-marked.
 Set of Bowman's Probes, and Critchett's Director in case.
 Anel's Lachrymal Probe, and Two Silver Styles.
 Cataract Needle, and Walton's Scoop in case.
 Tenotomy Knife.
 Denman's short Midwifery Forceps.
 Two Tourniquets, one each spiral and field.
 Jointed Probang for thrusting and extracting.
 Twelve Suture Needles, half-curved.
 Two Reels Ligature Silk, and one Reel Silver Wire.
 Pair Pin-cutting Forceps or Pliers.
 Tin Case for Isinglass and Plaster.
 Screw Cap Bottle, Two Reels Thread, and Wax.

In chequered ebony handles, the case complete as above £24 15 0

ARMY REGULATION CASE.

A superior Mahogany case, brass-bound and lined with silk velvet, containing—

Small Liston's Amputating Knife for the flap operation.
 Medium ditto ditto ditto.
 Large Liston's Amputating Knife ditto.
 Large Amputating Saw.
 Amputating Saw with shifting back.
 Three Operating Scalpels.
 Straight Bistoury.
 Two Curved Bistouries, sharp and probe-pointed.
 Hernia Knife.
 Liston's Bone Forceps, circular joints.
 Improved Bullet Forceps, with shifting blades.
 Two Dieffenbach's Artery Forceps.
 Pair Dissecting Forceps.
 Liston's or Luer's Artery Forceps.
 Liston's Needle with handle.
 Aneurism Needle.
 Silver Double Trachea-Tube.
 Four elastic gum web Catheters, Nos. 1, 4, 7, and 9.
 Three Silver Catheters, Nos. 3, 5, and 8 (hall-marked).
 Gun-shot Probe, electro-plated.
 Hernia Director.
 Tenaculum.
 Scalpel, strong (scale tang).
 Petit's Screw Tourniquet.
 Medium size Trephine.
 Hydrocele Trocar with Silver Canula.
 Double-extracting Probang.
 Bladder Trocar and Canula.
 Double Elevator.
 $\frac{1}{2}$ oz. Ligature Thread.
 Reel of Arnold and Son's Ligature Silk Cord.
 Six Curved Suture Needles.

In chequered ebony handles, the case complete as above £12 5 0

SET OF INSTRUMENTS FOR A SURGEON IN THE ROYAL NAVY.

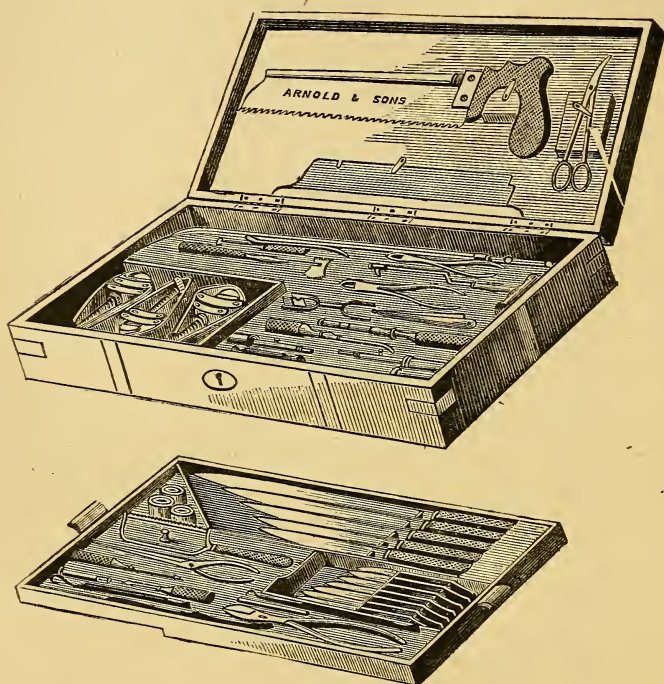

FIG. 5.

A superior Mahogany case, brass-bound and lined with silk velvet as Fig. 5, containing—

- Large Amputating Saw, with spare blade.
- Metacarpal Saw.
- Large Amputating Knife for the flap operation.
- Medium ditto ditto.
- Small ditto ditto.
- Two Catlins.
- Liston's Artery Forceps.
- Two Tenaculums.
- Six Operating Scalpels.
- Two Petit's Tourniquets.
- Liston's Bone Forceps, circular joints.
- Skull Forceps.

Three Trephines, small, medium, and large.
 Large Trocar for Paracentesis with Silver Canula.
 Small Trocar for Hydrocele, with Silver Canula.
 Hey's Skull Saw and Lenticular.
 Elevator and Trephine Brush.
 Two Silver Catheters, Nos. 5 and 8, hall-marked.
 Two Elastic Gum Web Catheters, Nos. 7 and 9.
 Fox's Tooth Key with three claws.
 Two pairs Tooth Forceps, curved and straight.
 Tooth Punch and Gum Lancet.
 Pair strong Scissors and Head Razor.
 Two Seton Needles.
 Pair of Bullet Forceps and Gun-shot Probe.
 Scoop for extracting Balls, and Probang with spring end.
 Probang for applying solutions.
 Two dozen Suture Needles assorted.
 Curved Bistoury, probe point, and curved Bistoury, sharp point.
 Fahrenheit's Thermometer.
 Arnold and Sons' Ligature Silk.

In chequered ebony handles, the case complete . . . £16 10 0

To complete an outfit for a Surgeon in the Royal Navy the following additional instruments are requisite :

Apparatus for restoring suspended animation, consisting of circular
 Spring Bellows, fitted with Nostril Pipes and Ear Tubes (large
 Bottle with cap).

Two Bleeding Lancets.
 Stomach Pump with Improved Flute Key Lever.
 Complete case of Pocket Instruments.
 Six Bleeding Lancets in leather case.
 Two dozen Elastic Gum Bougies in case.
 Two sets lined Splints.
 Two pint Metal Clyster Syringes.
 Six Urethra Syringes.
 Four Petits Tourniquets.
 Twenty yards Tourniquet Webbing.
 Twelve Flannel or Linen Roller Bandages.
 Two eighteen-tailed Bandages.
 Sixty yards of Tapes, various widths.
 Complete case of Cupping Instruments.
 Packet of Suture Needles.
 Arnold and Son's Ligature Thread.

The above in plain chest, with lock and key . . . £14 14 0

SET OF INSTRUMENTS FOR AN ASSISTANT SURGEON IN THE ROYAL NAVY.

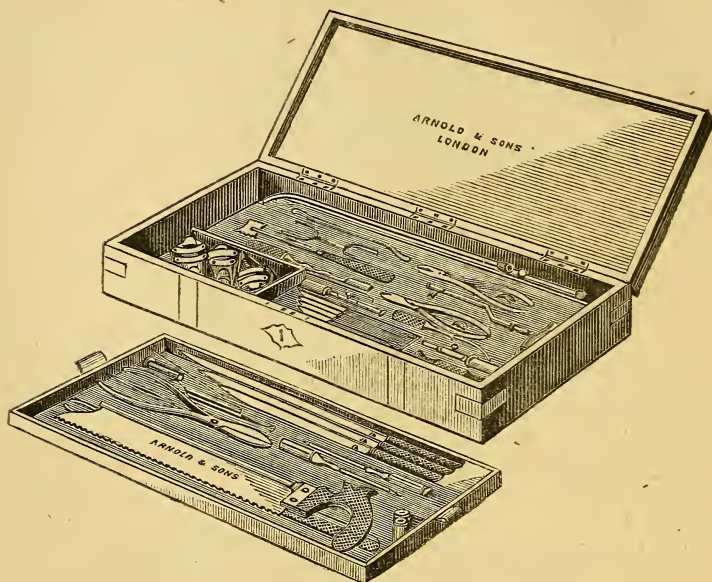

FIG. 6.

A superior Mahogany case, brass-bound and lined with silk velvet, as Fig. 6, containing—

- Amputating Saw, large.
- Metacarpal Saw with separate blade.
- Amputating Knife, large.
- Amputating Knife, medium.
- Catlin.
- Five Operating and one Tang Scalpel.
- Liston's Artery Forceps.
- Two Tenaculums.
- Two Improved Trephines, small and medium.
- Trephine Brush.
- Two Petit's Tourniquets.
- Hey's Skull Saw and Raspitory.
- Skull Forceps and Elevator.
- Liston's Bone Forceps, circular joints.
- Two Silver Catheters, Nos. 5 and 8.
- Two elastic gum web Catheters.
- Two pairs Tooth Forceps, curved and straight.
- Fox's Tooth Key with three claws and Tooth Punch.

Gum Lancet and Seton Needle, in tortoiseshell.
 Gun-shot Probe and Bullet Forceps.
 Probang with spring for thrusting and extracting.
 Large Trocar for Paracentesis, with Silver Canula.
 Small Trocar for Hydrocele, with Silver Canula.
 Fahrenheit's Thermometer.
 One dozen curved Needles.
 Reel of Arnold and Son's Surgical Silk Cord.

In chequered ebony handles, the case complete . . . £11 11 0

To complete an outfit for an Assistant Surgeon in the Royal Navy the following additional Instruments are requisite:—

Complete case of Pocket Instruments.
 Twelve Bleeding Lancets in cases.
 Six Pewter Syringes.
 Ligature Thread.

The above in plain case £4 0 0

Note.—When an Assistant Surgeon is appointed to a ship not having a Full Surgeon, the following instruments are necessary in addition to above:—

Six Bougies in case	£0 6 0
Set of Lined Splints	0 3 6
Three Flannel or Calico Roller Bandages	0 2 0

SET OF INSTRUMENTS REQUIRED BY A SURGEON APPOINTED TO THE ROYAL MAIL STEAM-PACKET COMPANY.

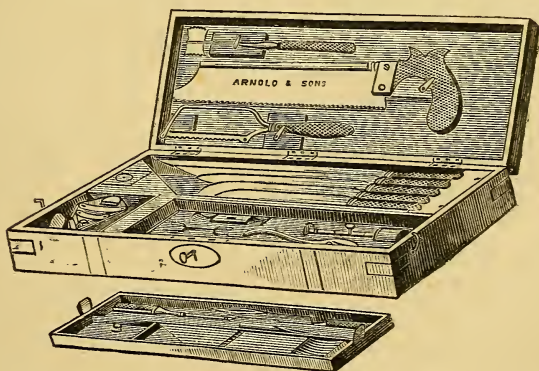

FIG. 7.

A superior Mahogany case, brass-bound and lined with silk velvet, as Fig. 7, containing—

Large Amputating Saw.
 Metacarpal Saw, with spare blade.
 Large Amputating Knife for the flap operation.
 Medium Amputating Knife ditto.
 Large Circular Amputating Knife.
 Medium ditto ditto.
 Catlin.
 Pair Bone Forceps, circular joints.
 Liston's or Luer's Artery Forceps.
 Spring Operating Forceps.
 Two Operating Scalpels and Finger Knife.
 Two Curved Bistouries, probe and sharp point.
 Large Trocar for Paracentesis, with Silver Canula.
 Small Trocar for Hydrocele ditto ditto.
 Trephine and Hey's Skull Saw.
 Elevator and Skull Forceps.
 Trephine Brush and Spring Probang.
 Aneurism Needle.
 Petit's Tourniquet, spiral.
 Twelve curved Suture Needles.
 Reel of Arnold and Son's Surgical Silk Cord.

In chequered ebony handles, the case complete . . . £10 10 0

To complete an outfit the following additional Instruments are requisite:—

Case of Midwifery Instruments, consisting of Midwifery Forceps, Lever, Perforator, Blunt Hook, Crotchet, and Craniotomy Forceps.

Complete set of Cupping Instruments.

Set of gum elastic Bougies in case.

Case of Tooth Instruments.

Case of Silver Catheters, Nos. 1, 3, 5, 7, 9, and No. 10, prostatic.

Case of six Bleeding Lancets.

Case of Pocket Instruments.

Thermometer.

Spring Probang for thrusting and extracting.

Six Urethra Syringes.

Metal Syringe.

Liston's Leg and Thigh Splints.

Set of Potts's Straight Splints.

Twenty Calico Roller Bandages.

Tape and Thread.

The set of Instruments as enumerated above . . . £18 18 0

SET OF INSTRUMENTS REQUIRED BY A
SURGEON APPOINTED TO THE PENIN-
SULAR AND ORIENTAL STEAM NAVIGA-
TION COMPANY.

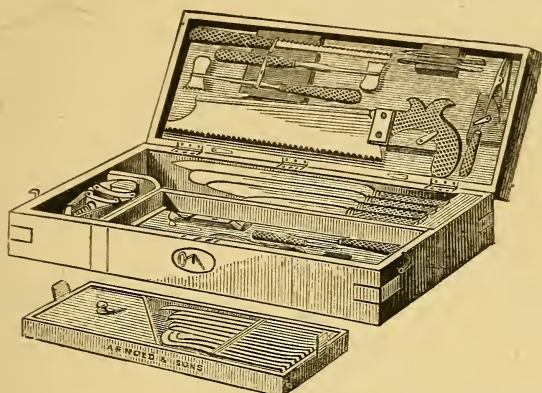

FIG. 8.

A superior Mahogany case, brass-bound, lined silk velvet, or polished throughout, as Fig. 8, containing —

- Large Amputating Saw.
- Straight Finger Saw.
- Large Liston's Amputating Knife for the flap operation.
- Medium ditto ditto.
- Large Circular Amputating Knife.
- Catlin.
- Pair Bone Forceps, circular joints.
- Spring Artery Forceps.
- Trephine Medium and Trephine Brush.
- Two Hey's Skull Saws, and Elevator.
- Two Operating and one Scale-tang Scalpel.
- Two straight Finger Knives.
- Two Curved Bistouries, probe and sharp-pointed.
- Large Trocar for Paracentesis, with Silver Canula.
- Small Trocar for Hydrocele ditto.
- Hernia Bistoury and Director.
- Pair Bullet Forceps, and Long Probe.
- Petit's Screw Tourniquet.
- Aneurism and Suture Needles.

In chequered ebony handles, the case complete . . . £10 10 0

To complete an outfit the following additional Instruments are requisite—

Cupping Instruments, complete in case.
 Tooth Instruments ditto.
 Pocket Instruments ditto.
 Three Male Silver Catheters, hall-marked.
 Silver Female Catheter, hall-marked. }
 Pair of Midwifery Forceps.
 Six Metallic Bougies.
 Six Bleeding Lancets.

The set of Instruments as enumerated above . . . £12 0 0

SET OF INSTRUMENTS REQUIRED BY A SURGEON APPOINTED TO AN EMIGRANT SHIP.

Case of Amputating Instruments.
 Case of Cupping Instruments.
 Pocket case of Instruments.
 Case of Tooth Instruments.
 Four Silver Catheters, 2, 4, 6, and 8, hall-marked.
 Silver Female Catheter, hall-marked.
 Four elastic gum web Catheters.
 Midwifery Instruments in case, containing Midwifery Forceps,
 Perforator, Craniotomy Forceps, Blunt Hook, and Crotchet.
 Four Bleeding Lancets, in case.
 Elevator.
 Trachæotomy Tube.
 Trephine and Trephine Brush.

The set of Instruments as enumerated above . . . £19 19 0

DR. ANGOVE'S ACCIDENT CASE.

Extract from the *Lancet*, May 21st, 1870.

“SIR,—The accompanying description of my accident case will be found useful I think, by those of my fellow-practitioners who do the greater part of their work on horseback. The advantages are that it will contain instruments enough for almost any accident, together with lint, plaster, bandages, tourniquet. &c.; and by

keeping this stocked and hung up in a handy place, you are ready to be off at any moment. It is easily carried on horseback. By taking the instruments, &c., out you have an oblong box, in which you can put what you like, the instruments being only kept in by a leather strap and an elastic band, which do not take up any room in case.

"In a mining practice one rarely if ever knows the nature of the accident he is called to; I therefore find it valuable, being 'with my case' ready for the smallest cut or anything else, including an amputation.

"Messrs. Arnold and Sons, of 35, West Smithfield, made mine for me; they keep them in stock empty, or will fill them according to order. The cases are made of hard leather, will stand any amount of knocking about, and cost a very small sum.

"I am, Sir, your obedient servant,

"E. SCUDAMORE ANGOVE.

"Ivy House, Camborne, Cornwall, March, 1870."

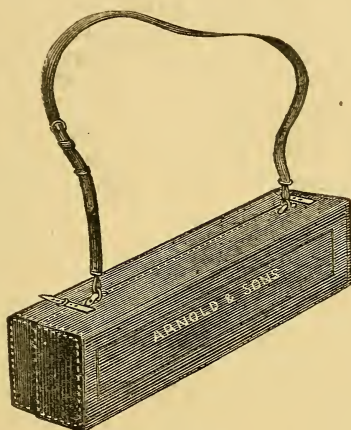

FIG. 9.

Dr. Angove's Accident Case, dimensions $14 \times 4\frac{1}{2} \times 3\frac{1}{2}$, as fig. 9, containing—

Amputating Saw, large.
 Bullet Forceps, improved, with shifting blades.
 Amputating Knife, in chequered ebony handle.
 Catlin ditto.
 Finger Saw. ditto.
 Scalpel, operating.
 Bone Forceps, circular joints.
 Artery Forceps, Luer's or Liston's.
 Pair strong Scissors.
 Two Silver Probes.
 Needles and Suture Silk.

Complete with Instruments, as above	£4	4	0
Leather case with swivels and strap (without Instruments).	0	17	6
Morocco ditto, lined velvet	1	1	0

HOSPITAL FIELD PANNIERS.

Instrument Pannier contains—Operating Instruments, Pocket Instruments, Enema, in case, Twenty-four Calico Roller Bandages, Three Water-dressing Bandages, Twelve elastic gum web Catheters, Twelve ditto Bougies, Six Field Tourniquets, One Petit's Spiral Tourniquet, Twelve Surgeon's Needles, Two pieces of Tape, Ligature Thread, Set Olme's Leg Splints, Set Potts's Hollow Arm Splints, Set Lined Splints, Metal Bed-pan, Metal Washing Basin, Two packets Pins.

Medicine Pannier contains—Thirty-one Stoppered Bottles, Two 1 quart ditto, Two $\frac{1}{2}$ pint ditto, Five $\frac{1}{4}$ pint ditto, Twelve 2 ounce ditto, Five 1 ounce ditto, Five $\frac{3}{4}$ ounce ditto, Five 2 ounce capped Æther Bottles, Six Japanned Tin Boxes, Pill Tile, Pair of Scissors, Pill Knife, Palette Knife, Graduated Measure, Pestle and Mortar, Scales and Weights, Pewter Cup, Three Sponges, Packet Cotton Wool, Demy Paper, Twine, Waxed Paper, Prepared Tissue, Three Glass Syringes, Lantern, Corkscrew, Pill Boxes, Oiled Silk, Gallipots, Corks, Wax Candles, Inkstand, Writing Paper, Labels, Pens, Wafers, Sealing Wax, Tin of Matches, Tins for Tea, Sugar, Arrowroot, Coffee, &c.

The two pairs are constructed to form a Field Operating Table.

The pair of Panniers complete as above . . . £50 0 0

The above case complete £9 0 0

ARNOLD AND SON'S REGISTERED OBSTETRIC BAG.

AS SUGGESTED BY DR. GREENHALGH.

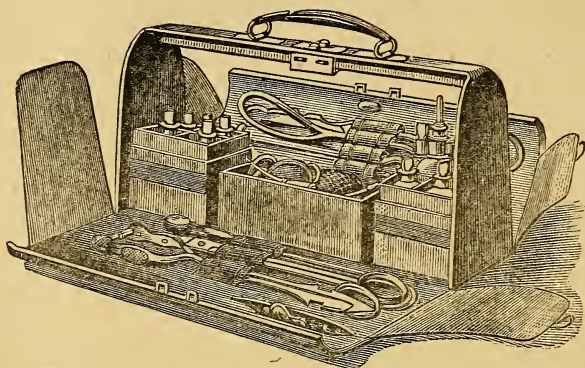

FIG. 21.

Fig. 21 showing the Bag open. Fig. 22 the Bag closed. The Bag contains Dr. Greenhalgh's Midwifery Forceps, Improved Double Action Perforator, Craniotomy Forceps, Lazarovitch's Blunt Hook and Tape, Crotchet with Cross Handle, Pair of Frænum Scissors, Female Catheter, Skinner's Chloroform Inhaler, Chloroform Drop Bottle, Uterine Syringe and Enema, Dr. Richardson's Spray Apparatus, and Stoppered Bottles for Ergot, Tincture of Opium, Compound Spirits of Ammonia, Anæsthetic Ether, Chloroform, Brandy, &c., &c.

Extract from the *Lancet*, March 26th, 1870:—"We have carefully inspected one of these bags, and consider them a decided success."

British Medical Journal, April 23rd, 1870:—"The obstetrician and general practitioner will find it in truth a *multum in parvo*. At first sight eight pounds may appear a heavy price to pay for the luxury of such a bag, but its fittings are of the very best quality and workmanship."

Medical Times and Gazette, April 9th, 1870:—"Messrs. Arnold and Sons have invented an Obstetric Bag, which certainly is as near perfection as anything we have seen."

Medical Press and Circular, April 13th, 1870:—"The Obstetric Bag is admirably arranged, and we offer the maker our congratulations."

Medical Mirror, September, 1st, 1870 :—"Practitioners who delight in elegances will find this Bag designed with good taste, while it is furnished with instruments as good in quality and as finished in workmanship as they could wish."

Dr. Tanner's Manual of Midwifery :—"An Obstetric Bag has recently been introduced to the notice of obstetricians by Messrs. Arnold and Sons, of West Smithfield, and from personal experience the author can conscientiously and confidently recommend its use to his professional brethren."

Gum Lancet and Tenaculum, in tortoiseshell, with French catch, as Fig. 79	0	8	6
---	---	---	---

Ligature Silk, Arnold and Sons' improved, possesses the following advantages over all existing silks hitherto manufactured:—Pure silk and free from all dressing or colouring matter; will not kink or curl under any circumstances; immense strength, and being plaited, will tie securely without untwisting.

Tablet, with four assorted sizes of silk wound thereon, in neat paper case complete	0	1	6
---	---	---	---

Extract from the *Lancet*, October 15th, 1870, page 556:—"We have been supplied with a specimen of this cord, which appears to us to be very good."

British Medical Journal, October 8th, 1870, page 393:—"Its recommendations are that it does not twist or curl when used, like the ordinary silk."

Medical Times and Gazette, October 15th, 1870, page 465:—"It is of a plaited texture, very strong, and is free from all dressing or colouring matter."

Medical Press and Circular, October 12th, 1870, page 300:—"We have seen a sample of this substance, made by Messrs. Arnold and Sons, and can strongly recommend it. We hope some of it may be sent out to the French at the seat of war."

Nicholl's Blowpipe and Stilette	0	3	6

Extract from the *Lancet*, January 21st, 1871:—"The Blowpipe now in use it continually getting blocked up in consequence of the necessity of having to thrust it through animal tissues."

Extract from the *British Medical Journal*, March 4, 1871:—"An improved form of Blowpipe for dissecting purposes has been devised by Mr. Nicholls, and is manufactured by Messrs. Arnold and Sons, of West Smithfield. The instrument, if not used for dissection, may be employed as an ordinary trocar and canula."

EYE INSTRUMENTS.

Leather case, containing—

Cataract Knife.
 Pair Iris Scissors.
 Iris Forceps.
 Cilia Forceps.
 Curette and Hook.

Tyrrell's Hook.
 Two Needles.
 Two Lachrymal Probes.
 Spring Speculum.

The above, in case £2 10 0

Morocco case, lined silk velvet, containing—

White Cooper's Cataract Knife.
 Beer's ditto ditto.
 Beer's Needle for Solution.
 Saunder's ditto.
 Scarpa's ditto.
 Tyrrell's Hook.
 Silver Hook and Curette.
 Adam's Eye-lid Retractor.
 Two Paris Maunoir's Scissors.
 Set of Bowman's Lachrymal Probes.
 Critchett's Director for the Canaliculus.
 Pair Cilia Forceps.
 Pair Iris Forceps.

The above, complete in case £3 12 0

Handsome Morocco case, lined silk velvet, containing—

White Cooper's Cataract Knife.
 Beer's ditto ditto.
 Dixon's ditto ditto.
 Two Sichel's ditto.
 Two Scarpa's Needles.
 Two Saunder's ditto.
 Two Beer's ditto.
 Walton's Foreign Body Scoop.
 Walton's Curette and Hook.
 Tyrrell's Hook.
 Schuft's Double Spoon.
 Two Pairs Maunoir's Scissors.
 Cilia Forceps.
 Two Iris Forceps.
 Set of Bowman's Probes.

Critchett's Director for the Canaliculus.

Adams' Speculum.

Gilt wire Spring Speculum.

The above set, complete £6 10 0

Extra superior case, lined silk velvet, containing—

One Dixon's Knife.

Two Sichel's ditto.

Silver Curette and Hook.

Tyrrell's Hook.

Canaliculus Knife.

Set of Bowman's Probes.

Critchett's Director.

Iridectomy Knife, Broad.

Iridectomy Knife, Narrow.

Critchett's Knife.

Broad Cutting Needle.

Bowman's Stop ditto.

Two Scarpa's ditto.

Two Beer's ditto.

Two Dalrymple ditto.

Two Small Scalpels.

Spatula.

Entropium Forceps.

Schuff's Forceps.

Iris Forceps, curved.

Iris Forceps, straight.

Cilia Forceps.

Scissors for the Canaliculus.

Two Pairs Maunoir's Scissors.

Strabismus Scissors.

Spring Specula, with slide.

Strabismus Hook.

Strabismus Forceps.

Lever Canula Instrument with Scissors and Forceps.

PESSARIES.

Blackbee's Patent Self-adjusting Pessary, for anteversion, antiflexion, retroversion, retroflexion, or procidentia,	0	7	6
Dr. Greenhalgh's Elastic Spring Pessary six sizes, each Fig. 114	0	2	0

The advantages of these Pessaries are cheapness, softness, indestructibility, facility of introduction, pliability, enabling them to be moulded to any form, applicability to all forms of uterine and vaginal displacements. No obstacle to other local treatment.

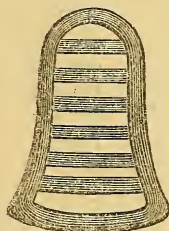

Fig. 116.

Dr. Greenhalgh's Elastic spring Pessary, with two India rubber transverse bands, Fig. 115	0	2	6
Ditto ditto with four ditto	0	3	0
Ditto ditto with six ditto Fig. 116	0	3	6

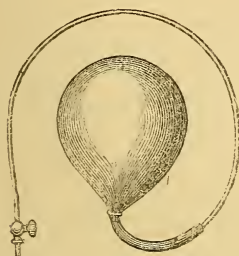

Extract from *British Medical Journal*, May 23rd, 1868:—"They are easier of introduction and removal than Hodge's Pessary, and can be more easily adjusted; occasions little or no inconvenience."

Arnold and Sons, having *originally* made these Pessaries *specially* for Dr. Greenhalgh, caution the Profession against many sold and represented as their manufacture, which are different in shape, construction, and material, and, consequently, useless for the purpose intended.

Dr. Braxton Hicks's india-rubber Apparatus for the restoration of chronic inversion of the uterus.

ICE AND HOT WATER BAGS.

Dr. Chapman's Ice Bag, which may be filled with either ice or iced water, is divided by external clamps or internal septa into two, three, or more cells, allowing of its application either to the whole or any part of the back, the patient being enabled to remain upright or walk about during its use. The mouth of the bag is closed by a clamp.

No. 10	12	14	16	18	20	22	24	26in.
7/6	8/	9/	10/6	12/6	14/6	15/	16/	18/

Dr. Chapman's Hot Water Bag which may also be used for the application of moderate degrees of cold, consists of two parallel tubes a slight distance apart, and communicating at the top and bottom, the mouth of this Bag is closed by means of a screw.

Ditto in case	5	12	6
Ditto with glasses complete	5	17	6

Extract from the *Medical Times and Gazette*, January 20th, 1872 :—"The main spring is attached to the framework of the instrument by a hinge joint, which permits free vertical but no lateral movement. Its free extremity, which is covered by an ivory pad, rests upon the artery (usually the radial) from which it is proposed to obtain a tracing. To this spring is attached a block which forms the centre of movement for a lever of the third order, which encloses it by the bifurcation of its extremity, a pin projecting from either side of the block, and passing through each extremity of the bifurcation, thus insuring a perfect vertical movement free from lateral oscillations."

Mr. Coleman's Odontological Bag (Registered), containing—

- Twelve pairs Tooth Forceps.
- Three Elevators.
- Gum Lancet, in tortoiseshell handle.
- Tenaculum ditto.
- Scalpel ditto

Paget's Knife.

Nitrous Oxide Apparatus, consisting of a Twenty-five gallon
Bottle of Liquid Gas, Bloxam's Bag, two face-pieces, three
props, two way stopcocks, unions, &c.

Eight half-ounce stoppered glass bottles.

Four two-ounce ditto ditto.

Twenty-four Excavators, steel handles.

Twelve Rose Drills.

Twenty-four Plugger's, wooden handles.

Six Enamel Cutters.

Four Burnishers.

Six Files.

Mouth Mirror.

Mouth Syringe.

Four steel Scalers.

Box Powdered Pumice.

Two Dragon Roots.

Spatula with Spoon.

Small Agate Pestle and Mortar.

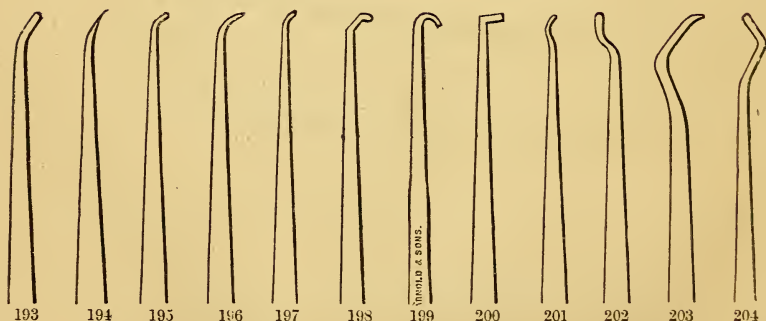

Small Spirit Lamp.

Dressing Forceps.

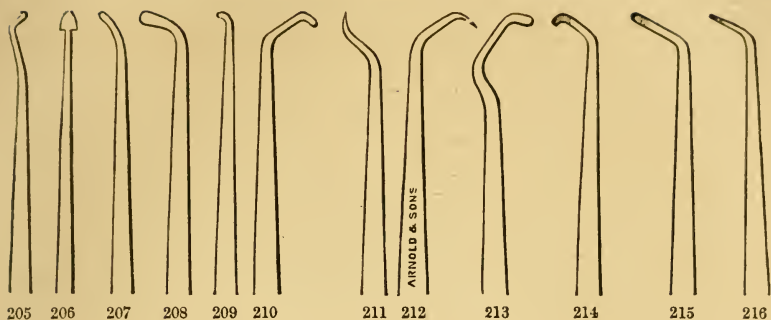

Foil Forceps.

Trays for gold-foil, German tinder, &c., &c.

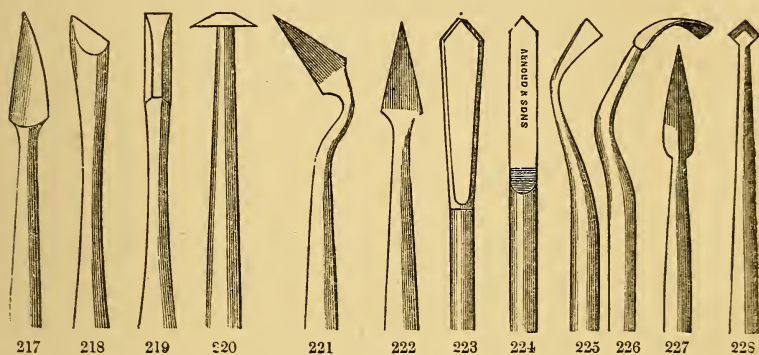

The above set complete 20 0 0

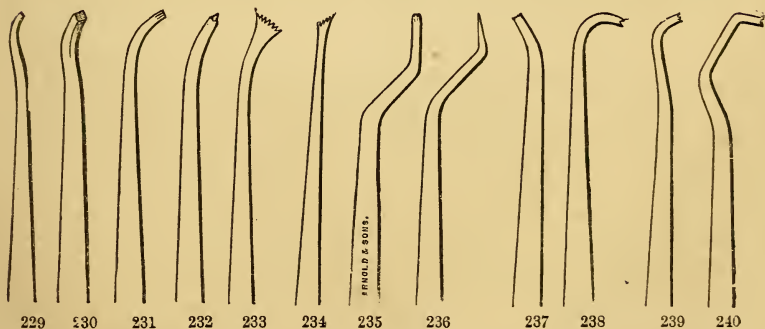

Excavating Instruments, steel handles, as Fig. 193 to 204 . 0 1 0

TROCARS.

Morocco leather case, containing—

Hydrocele Trocar, in chequered ebony handle, and silver ferrule and canula.

Glass Syringe, with platina point and ivory mounts.

The set complete £0 17 6

Morocco leather case, lined silk velvet, containing—

Large Trocar for paracentesis abdominis, in chequered ebony handle, with silver ferrule and canula.

Medium Trocar for ascites ditto.

Small ditto hydrocele, ditto.

The set complete £1 5 0

Superior morocco leather case, with spring lock and lined silk velvet, containing—

Large Trocar for paracentesis abdominis, in chequered ebony handle, with silver ferrule and canula.

Medium Trocar for ascites, ditto.

Small ditto hydrocele, ditto.

Ponteau's curved Trocar for puncturing the bladder per rectum.

Glass Syringe, with platina point and ivory mounts.

The set complete £2 7 6

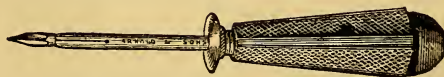

FIG. 267.

Hydrocele Trocar, in chequered ebony handle, silver canula and ferrule, Fig. 267 0 6 6

Ditto ditto ditto second quality	.	.	.	12	12	0
Ditto ditto ditto superior quality	.	.	.	17	17	0

Measurements required for amputation above knee: length from crutch to end of stump, circumference round end, middle, and top of stump (close to crutch); the length of sound limb from crutch to centre of knee, centre of knee to ground, height from top of knee, when bent, to the ground. State if right or left; the boot to be worn is required.

Extract from the *British Medical Journal*, January 14, 1871:—"Mr. Kempner has devised an ingenious form of Artificial Leg; it is made of leather, with hinges, and is extremely light. Mr. Kempner has himself lost his leg, and necessity has been with him the mother of invention. He has taken great pains to discover the exact position at which the hinges should be placed to secure easy motion, and how the problem of combining lightness with strength might be best solved. We have seen him walk, kneel, &c., and he does so with remarkable ease and quickness, and we strongly recommend a trial of it to all who need such help."

"29, Seymour St., W.

"Mr. Kempner has fitted an Artificial Leg to a patient whose leg I amputated at the knee joint, and the result has certainly been most satisfactory, as I saw the patient walk with ease, unsupported by stick or crutch, a week after he had first used the leg. The principle of Mr. Kempner's Artificial Leg is simple, and the instrument is strong and durable, without being heavy.

(Signed) "CAMPBELL DE MORGAN, F.R.S.

"1st December, 1870."

"Surgeon to the Middlesex Hospital."

Messrs. Arnold and Sons have purchased the exclusive right to manufacture the Improved form of Artificial Leg invented by Mr. Kempner, and have made special arrangements with him to superintend the manufacture thereof.

Artificial Arm, with hook, ring, knife, or fork, for amputation below elbow £1 15 0

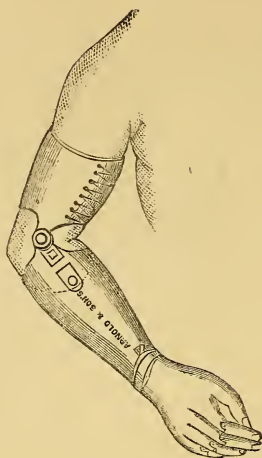

FIG. 290.

	£	s.	d.
Artificial Arm, below elbow, with Hand attached, Fig. 290	8	10	0
Ditto ditto best quality	10	10	0

Measurements required for amputation below elbow : length from elbow to end of stump, circumference above, round, and below elbow, circumference round end of stump ; length of sound arm, elbow to wrist, and if right or left. When a hand is required a glove should be sent, and the outline of hand traced on paper.

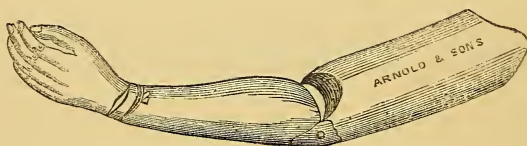

FIG. 291.

Artificial Arm, for amputation above elbow, with Hand attached, Fig. 291	12	12	0
Ditto ditto best quality	15	15	0

Instruments for above extra.

Socket Arm, fitted with ring, hook, knife or fork, for amputation above elbow	2	0	0
---	---	---	---

Measurements required for amputation above elbow : length from axilla to end of stump, circumference round end, middle, and upper part of stump ; length of sound arm from axilla to elbow, from elbow to wrist ; if right or left. When a hand is required a glove should be sent, and the outline of hand traced on paper.

Cocking's Patent Poroplastic Sheet for Splints			

"It is light, porous, flexible, plastic, and economical—is made in all required strengths and sizes. It consists of a felted substance in sheets, is plastic when softened by heat, and becomes rigid when cold, and can be re-softened any number of times without injury; it is rapidly and easily cut to any shape and manipulated, the most difficult splint requiring but a few minutes to complete—is very well adapted for separate metal attachments, and is thus a very valuable material for interrupted splints. There is no glue used in its application, and the gums with which it is stiffened are quite harmless."—*Vide Lancet*, September 16, 1871; *British Medical Journal*, September 23, 1871; *Medical Press and Circular*, September 27, 1871.

Coleman's ditto	4	4	0

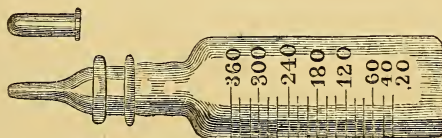

FIG. 333.

Bloxam's Improved Graduated Chloroform Drop Bottle, in leather case, size $4\frac{3}{4}$ in. + $1\frac{1}{4}$ in., Fig. 333	0	3	6
Ditto, in boxwood case	0	4	6

Vide British Medical Journal, March 11th, 1871, the *Lancet*, March 18th, 1871, *Medical Times and Gazette*, February 4th and 25th, 1871, *Medical Press and Circular*, March 22nd, 1871.

The Graduated Chloroform Bottle is exceedingly portable and simple. No assistant is required in the administration. The chloroform being spread over a large surface of lint, the amount of atmospheric air is very great. It is much safer, as you do not rely upon complicated valves. The amount of chloroform administered can at once be ascertained by the graduated scale.

SPRAY PRODUCERS.

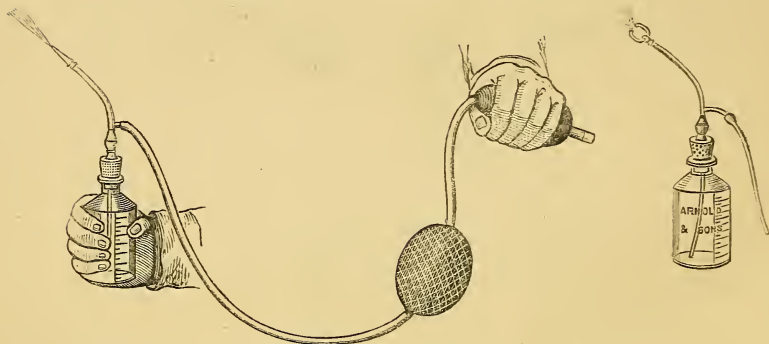

FIG. 334.

	£	s.	d.
Richardson's Ether Spray Apparatus, with Hand Ball, graduated stoppered Bottle, complete in mahogany case, single jet, Fig. 334	0	15	6

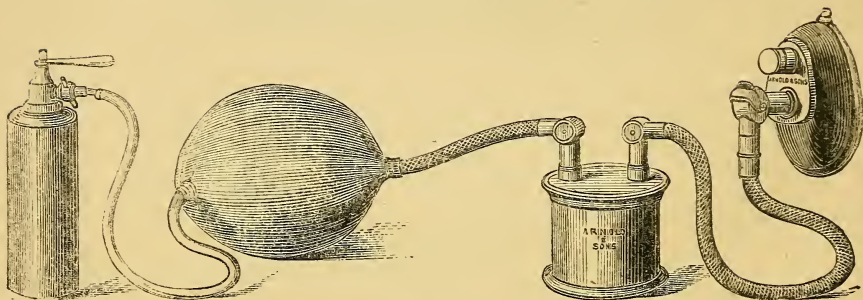

FIG. 337.

Arnold and Sons' Nitrous Oxide Bag Registered, containing 25-gallon bottle of liquid gas, with Mr. Coleman's Improved Economizer, Mr. Bloxam's bag and union, two-way stopcock, and Brain's face-piece, complete, Fig. 337

6 6 0

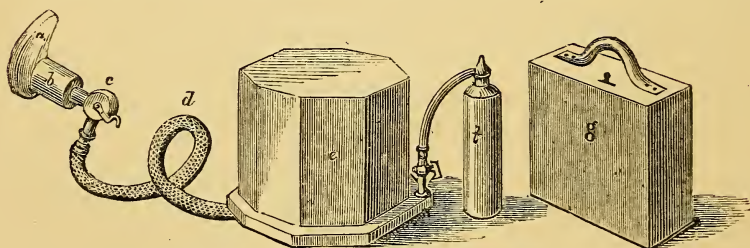

FIG. 333.

Edward's Patent Economizing Inhaler and Gas holder, complete, Fig. 338

3 5 0

Portable case for ditto

0 5 0

The Economizing Inhaler is constructed so that the gas exhaled from the patient is thoroughly filtered through lime; it then passes through the inhaling tube to the gas-holder, and back again at the next inspiration, thus being filtered a second time.

The gas is thus thoroughly purified from carbonic acid, and from all unhealthy emanations from the lungs, as soon as it passes from the

patient, and before it reaches the inhaling tube. On this account, and for other reasons, it claims superiority over all other apparatus of the kind. At the same time its low price places it within the reach of every operating dentist, whilst more complicated apparatus not only involve a large outlay, but also special instruction in their use.

	£	s.	d.

Stomach Pump and Enema combined, the stomach pump adjusted with improved flute key lever, in mahogany case, Fig. 345	1	17	6
Ditto ditto very superior	2	7	6
Arnold and Sons' Improved Stomach Pump	2	2	0
Brass Enema, with elastic tube and metal rectum pipe, in mahogany	0	7	6
Ditto ditto tubing covered	0	8	6
Dr. Bennett's Enema, complete	1	1	0
Ditto smaller	0	17	6
Ditto in leather pouch	1	1	0
Portable Enema, with brass telescopic tube, in leather case, size $8\frac{3}{4}$ in. long, $2\frac{1}{4}$ in. wide, $1\frac{1}{2}$ in. deep	0	16	0
Brass Enema, fitted with O'Beirn's Elastic Rectum Tube, in mahogany case	0	12	6

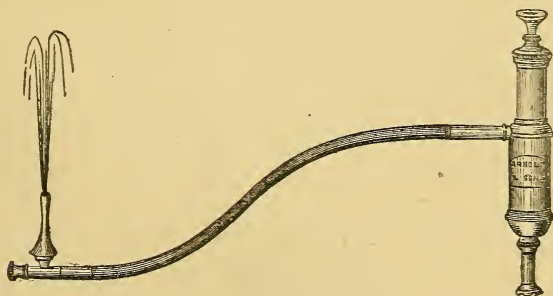

FIG. 346.

Arnold and Sons' Improved Double-action Enema, Fig. 346	1	5	0
Brass Enema, with elastic tubing, metal rectum and vaginal pipes, in mahogany case	0	15	0
Ditto ditto very superior	1	1	0

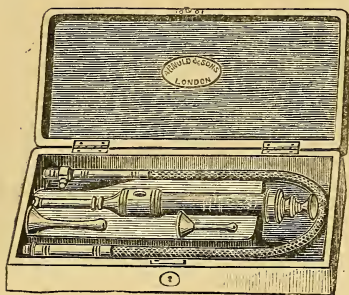

FIG. 347.

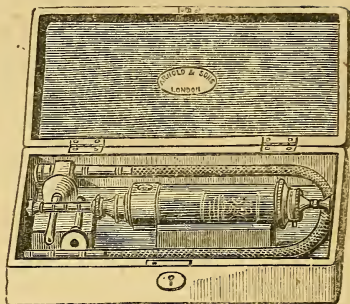

FIG. 348.

	£	s.	d.
Brass Enema, very superior, in mahogany case, Fig. 347	1	1	0
Arnold and Sons' Improved Brass Enema	1	5	0
Brass Enema, double action, with superior tubing, specially prepared to stand any climate, complete in mahogany case, polished throughout, Fig. 348	1	10	0
Portable Selfacting Enema	0	14	0

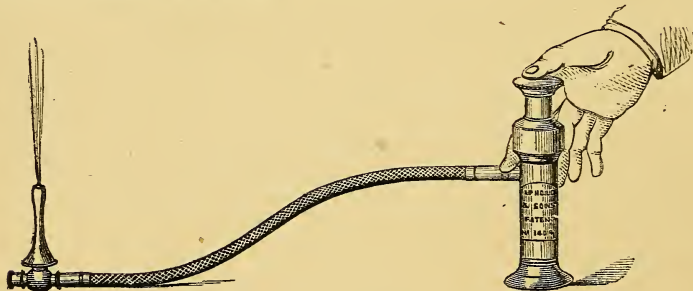

FIG. 349.

Arnold and Son's Patent Simplex Enema, No. 1, very superior, in mahogany case, lined velvet, as Fig. 349	0	16	0
Ditto ditto No. 2, in mahogany case	0	10	0
Ditto ditto No. 3, in wood case	0	5	0

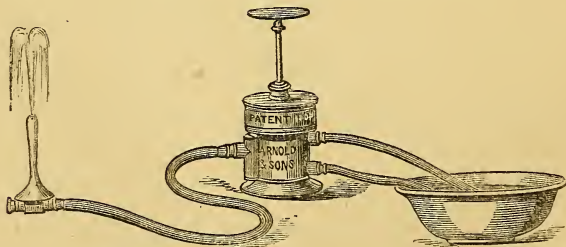

FIG. 350.

Arnold and Sons' Patent Facilis Enema, in mahogany case, lined velvet, as Fig. 350	0	17	6
--	---	----	---

Extract from *British Medical Journal*, June 22nd, 1872:—"They are very easy to use, needing only one hand to work them, and can be taken to pieces to clean and put together again in a few seconds."

Extract from *Medical Times and Gazette*, June 22nd, 1872:—"There is no packing on the piston, and they are so simple in construction that it is next to impossible they should get out of order."

Extract from *Lancet*, August 17th, 1872:—"Most of the Enema Apparatus hitherto invented present some disadvantages, which militate against their usefulness." All these *various* defects are remedied by the two new forms of apparatus made by Arnold and Sons.

Extract from *Medical Press and Circular*, June 26th, 1872:—"They are made entirely of metal, and the springs are of plated steel, so are not likely to rust or become weakened."

	£	s.	d.
Fountain Reservoir Enema, japanned, in leather case	0	15	0
Ditto continuous stream, brass barrel			
and tubings of brass	1	10	0

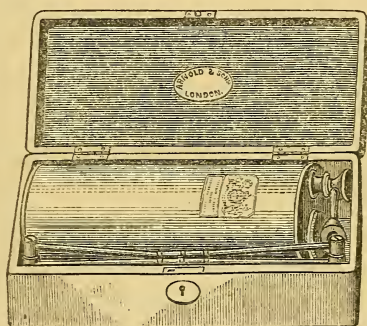

FIG. 351.

Arnolds' Improved Fountain Enema, with every improvement, in mahogany case, very superior, Fig. 351	2	2	0
Dr. Eguisier's Irrigateurs, metal, No. 1	0	17	6
Ditto ditto No. 2	1	1	0
Ditto ditto No. 3	1	4	0
Dr. Eguisier's Irrigateurs, brass, No. 1	1	7	6
Ditto ditto No. 2	1	10	0
Ditto ditto No. 3	1	14	0
Plain wood cases for above	0	4	0
Superior mahogany case, fitted with lock and key	0	6	0

SYPHON ENEMAS.

£ s. d.

Higginson's Syphon Enema, with bone rectum pipe, in slide cedar box	0	3	6
---	---	---	---

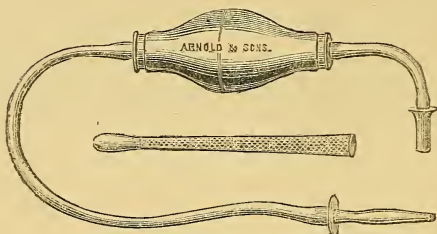

FIG. 352.

Higginson's Syphon Enema, with elastic vaginal pipe, Fig. 352	0	4	0
Ditto ditto superior	0	6	0

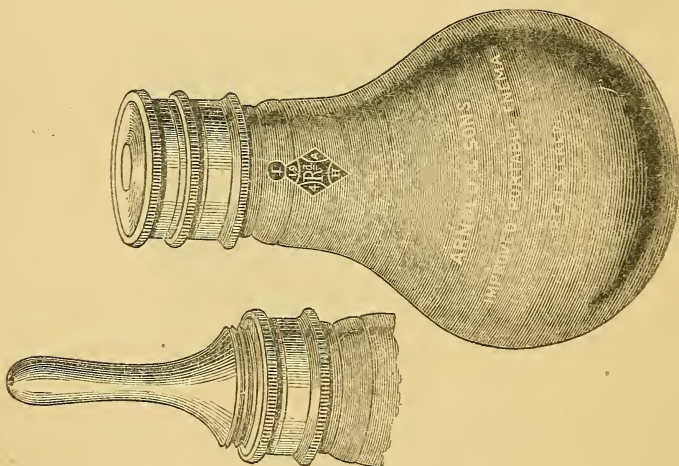

FIG. 353.

Arnold and Sons' Registered Portable Enema, Fig. 353 :—

2 oz.	4 oz.	8 oz.	12 oz.	16 oz.	
3/6	4/6	5/-	5/9	7/6	brass mounts.
3/-	3/9	4/6	5/-	7/-	white metal mounts.

Arnold and Sons' Registered Vaginal Syringe :—

4 oz.	8 oz.	12 oz.	16 oz.	
5/-	5/6	6/3	8/-	brass mounts.
4/-	5/-	5/6	7/6	white metal mounts.

Extract from *Lancet*, August 26th, 1871, p. 295—"There are many advantages in such an instrument. There is little liability of its getting out of repair. The instruments are fitted in various ways, and answer equally well as an Enema or Vaginal Syringe."

Extract from *British Medical Journal*, August 26th, 1871, p. 235:—"Messrs. Arnold and Sons, of 35 and 36, West Smithfield, London, have brought out an excellent Enema Syringe, which consists of an India-rubber Bottle fitted with a reversible pipe and mount, to which a cap is arranged, so that the Enema can be carried about full of fluid ready for use."

Extract from *Medical Times and Gazette*, August 19th, 1871, p. 236:—"The advantages of such an instrument will at once be seen, as there is no possibility of its getting out of repair. The mounts are made of brass, and carefully tinned on the inner side and every part which comes in contact with the fluid, so as to prevent the possibility of corrosion."

Extract from *Medical Press and Circular*, August 30th, 1871, p. 191:—"One of those simple improvements that, when once tried, excite surprise that they were not thought of before, has been made by Messrs. Arnold and Sons in the Elastic Enema Apparatus. We very strongly recommend this instrument, that it is sure to please all who try it."

	£	s.	d.
Injection Syringe, Arnold and Sons' Registered	0	3	6
Kennedy's Syphon Enema, small for children, with plain mounts, in wood box	0	3	6
Ditto ditto large	0	7	6
Kennedy's Syphon Enema, with covered tube and metal rectum pipe, in leather case	0	12	0

UTERINE INSTRUMENTS.

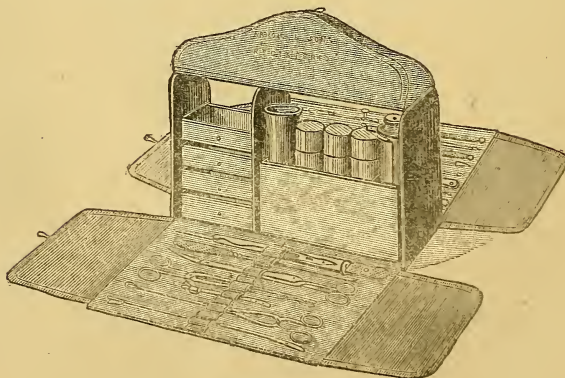

FIG. 388.

Gynæcological Bag (Arnold and Sons' Registered), Fig. 388,

suggested by Dr. Greenhalgh, containing two Fergusson's	£	s.	d.
Specula, large and small; one plated Bivalve Specula;			
two Sounds, large and small; two Scarifying Lancets;			
two Uterine Knives; Ellis's Uterine Dilator; Speculum			
Forceps. (cross or compound action) Spring Holder, potassa			
fusa; Arnold and Sons' seamless tube Caustic Holder;			
Sponge Holder; Sims' Double Hook; Sims' Double Screw;			
Sims' Curette; Maclintock's Ovum Forceps, improved;			
Dr. Greenhalgh's Bilateral Metrotome; curved Speculum			
Scissors; Bloxam's Chloroform Bottle; Female Catheter,			
Silver; four Dr. Greenhalgh's Spring Pessaries; six ditto			
Laminaria Tents; six short Tents; twelve Perforated			
Sponge Tents; Dr. Godson's Sponge and Laminaria			
Tent Introducer; three Dr. Greenhalgh's perforated			
Vulcanite Stems; Introducing Sound for ditto; two Dr.			
Greenhalgh's Spring Stems; Introductory Sound for			
Stems; four small Stoppered Bottles for potassa fusa;			
Argent. Nitr.; Acid Chromic, &c.; 1 oz. Bottle for Glyce-			
rine; Drawers for cotton-wool; Medicated Suppositories,			
&c. The Registered Bag, complete as above	21	0	0
Gynæcological Bag, without instruments, but with drawers,			
divisions, cases, &c. in Morocco leather	3	3	0

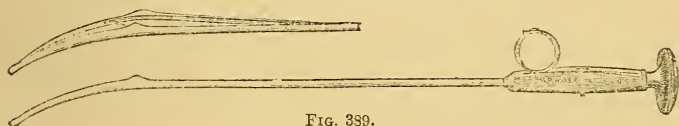

FIG. 389.

Dr. Priestley's Uterine Dilator, Fig. 389	.	.	.	1	15	0
Ditto ditto plated	.	.	.	2	0	0
Dr. Ellis's Uterine Dilator	.	.	.	1	15	0
Ditto ditto ditto	.	.	.	2	0	0

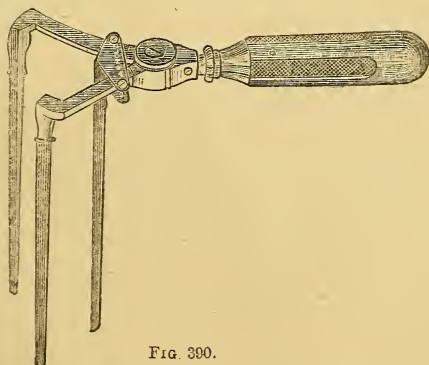

FIG. 390.

Uterine Dilator, with regulating screw, Fig. 390	.	.	2	2	0
--	---	---	---	---	---

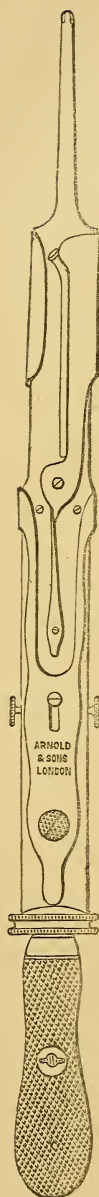

FIG. 391.

	£	s.	d.
Fluid Urethral Dilator	0	16	0
Ditto for dilating the os uteri, the dilating tube size of No. 2 Catheter, and will expand to size of No. 12	0	13	0
Dr. Barnes' complete set of india-rubber Dilators, with mounts, stopcocks, &c., fitted to Higginson's Syringe, the set complete in case	1	1	0
MacIntock's Ovum Forceps	0	15	0
Ditto improved	0	15	0
Sir J. Simpson's Ovum Forceps	0	10	0
Mathieu's cross-action Scissors and Forceps combined	1	10	0
Sponge Forceps for holding sponge	0	5	0
Dr. Greenhalgh's Bilateral Metrotome, with spring stems and Introducer, in morocco case complete, Fig. 391	4	4	0

The advantages of this instrument are—Smallness of uterine extremity; facility of introduction; acts obliquely with exactitude from within outwards; can be accurately adjusted to cut little or much, on one or both sides; blades protected by sheath, so as to avoid injury to the vaginal walls; can be used without the speculum or exposure; when duly regulated no risk of hæmorrhage.

Sir J. Simpson's Metrotome	1	4	0
Sims' ditto	2	2	0
Mathieu's ditto	2	12	6
Routh's ditto	2	2	0
Aveling's ditto	1	7	6
Dr. Greenhalgh's Metrometer Sound, for measuring any part of the cavity of the uterus in its long axis, or from side to side, or back to front, Fig. 392	2	2	0

This instrument consists of a canula traversed by a moveable shaft, at one extremity of which are two probe-pointed watch-springs, at the other a graduated scale, indicating, when liberated by a screw, the amount of divergence taking place within the cavity of the uterus, and hence its dimensions.

Sims' Uterine Sound	0	10	6
Sir J. Simpson's Uterine Sound	0	6	6
Ditto ditto jointed for portability	0	9	6
Dr. Hall's Uterine Sound, with soft flexible silver point	0	11	6

FIG. 392.

Ecraseurs, see pages 64, 65.

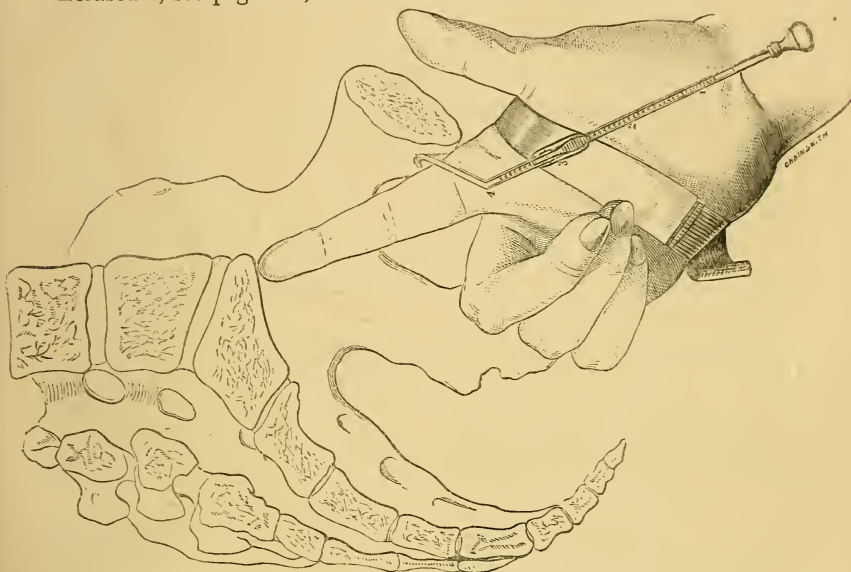

FIG. 393.

Dr. Greenhalgh's Pelvimeter, for giving exactitude to the
finger in admeasurements of the pelvis, Fig. 393 . . . £ s. d.
2 2 0

This instrument consists of a band of flexible metal, the extremities of which are connected by india-rubber webbing: can be firmly adjusted to any hand. To its upper extremity is attached a crutch, to fix the index finger, while at the lower end is a graduated scale and moveable button. From the centre of the band is a shaft, which can be fixed by a catch, moveable from before backwards and from above downwards, which can be regulated at the scale.

Dr. Greenhalgh's Spongio-piline and air or water Vaginal

Plugs, three sizes the set complete . . . 1 1 0

Possess facility of introduction and removal, accurate and comfortable adaptability.

Speculums. See pages 57, 127, 128, 129, 130.

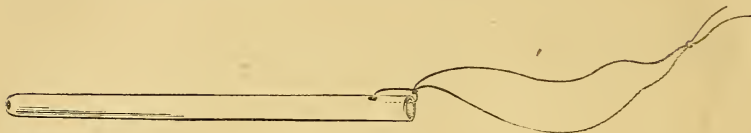

FIG. 394.

		£	s.	d.
Dr. Greenhalgh's improved perforated and tapering Sea				
Tangle Tents, long and short, Fig. 394 . . .	per doz.	0	7	0

Possess the following advantages:—Facility of introduction, rapidity of expansion, softness, drain for uterine secretions.

Solid Laminaria Tents	per doz.	0	4	0
Sims' Sponge Tents	ditto	0	3	6
Ditto Arnold and Sons' improved, perforated,				
very superior	per doz.	0	5	0

Dr. Greenhalgh's Jointed Galvanic self-retaining perforated				
Intra Uterine Stems	each	0	7	6

Secure facility of introduction, adaptability to the movements of the uterus, free escape of the uterine secretions, little liability to slip.

Sir J. Simpson's Galvanic Stems		0	5	6
Perforated Sponge Tents, coated with wax	per doz.	0	5	0

FIG. 395.

Dr. Godson's Sponge and Laminaria Tent Introducer,				
Fig. 395, with 3 jointed points		1	1	0
Ditto ditto with 1 pointed end		0	15	0

Extract from *Lancet*, April 22nd, 1871:—"The novelty of this instrument consists in the point intended for the reception of the tent being connected to the stilette by means of a screw, which permits of rotation, and of a small hinge-joint immediately above the screw, which gives a free lateral movement. The combination of these two contrivances confers on the point and the tent attached to it all the range of movement of a ball and socket joint, and enables the tent to find its way easily and without violence through the cervix. It possesses an additional advantage of permitting the introduction to be made without the aid of a speculum."

Sims' Sponge Tent Forceps		0	15	0

FIG. 396.

£ s. d.

Dr. Greenhalgh's Expanding and Self-retaining Tubular,
vulcanite and metallic, Intra-uterine Stems, Fig. 396 . 0 4 0

Possess the following advantages:—Ease of introduction, allow the secretions of the cavity of the uterus to pass through, not liable to slip out, by pressure against the cut surfaces after division of the cervix uteri, prevent hæmorrhage, can be retained for any period; incorrosive, and avoid the necessity for local dressings.

Introducer for ditto 0 3 6
Ditto plated, in ivory handle 0 6 0
Dr. Greenhalgh's perforated Vulcanite Stems, 6 sizes . each 0 3 0

Advantages:—Facility of introduction, escape of uterine secretions, incorrosive.

Introducer for ditto 0 3 6

Ditto plated, in ivory handle 0 5 0

Sir J. Simpson's German-silver Stems 3s. 6d. 0 5 0

Set of ditto, in case 2 5 0

Dr. H. Bennett's Silver Stems 5s. to 0 7 6

Set of ditto, in case 2 17 6

Dr. Greenhalgh's jointed Intra-uterine Stem, for ante flexion 0 7 6

Pessaries, see pages 72 and 73.

Dr. Greenhalgh's flexible india-rubber self-retaining Intra-uterine, perforated Stems, for flexions and strictures of the uterus 0 3 0

Female Catheters, see pages 66, 67 and 70.

Dr. J. B. Brown's Scissors for dividing the cervix 0 10 6

Dr. M. Sims' ditto ditto 0 10 6

Ditto blunt-pointed Knife ditto 0 17 6

Chloroform Inhalers, see page 133.

Simpson's Exploring Trocar, Silver 0 10 6

Hall's flexible Silver Uterine Probe 0 7 0

Dr. H. Bennett's Uterine case, containing Simpson's Uterine Sound, cross-action Forceps, Sponge Tent Introducer, Caustic Case, Potassa Fusa or Lint Holder; the set complete 2 2 0

Speculum Caustic Holder, with ebony handle 0 5 0

Ditto Lint Holder 0 4 0

Ditto Scarifying Lancet 0 4 0

Ellis's Caustic Holder 0 18 0

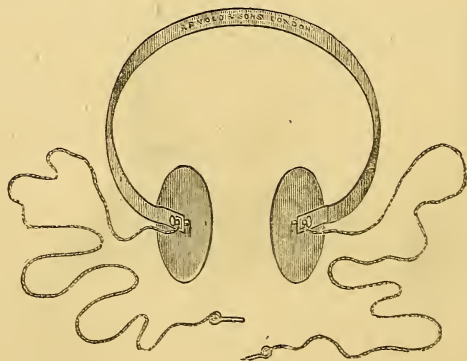

FIG. 417.

Mr. Cattlin's Apparatus for above, Fig. 417	0	15	0
---	---	----	---

Extract from Mr. Cattlin's report in Vol. iii., No. 6, of Odontological Society:—
 "A new Portable Battery, invented by Messrs. Arnold and Sons, of West Smith-
 field. At my suggestion they have adapted a spring with two plates, for the purpose

of instantly conveying a galvanic current to any part of the human body, in case of suspended animation, under the use of anæsthetics. . . . I have tried the effect of this instrument upon the lower animals, and have found its action to be very perfect."

	£	s.	d.

MICROSCOPES AND APPARATUS.

No. 1.—A neat and convenient Microscope, having a joint to incline the instrument to any angle :—Rack adjustment to body, revolving Diaphragm, solid bronzed Stand, $\frac{1}{2}$ and 1-inch Object Glass, Live Box, and Dissecting Forceps. Complete in cabinet, with four objects, lock and key 2 2 0

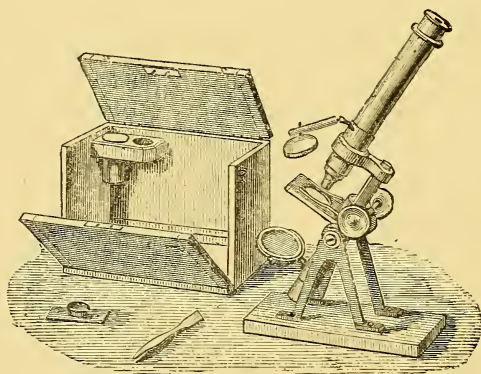

FIG. 427.

No. 2.—Arnold and Sons' Portable Microscope, Fig. 427. This Microscope is very portable and substantial in its construction, inclines to any angle, with rackwork adjustment for focussing, working up on a triangular bar of gunmetal. Attached to the stand is a condenser, with universal joints for opaque objects, a Water Box, Tweezers, and a good 1 and 2-inch combined Object Glass, with Sliding Tubes; the whole complete in a portable case. When the instrument is folded down for packing away, the body slides through the stage, no screwing or unscrewing is necessary, the stand always being intact, with condenser attached. Price complete 3 3 0

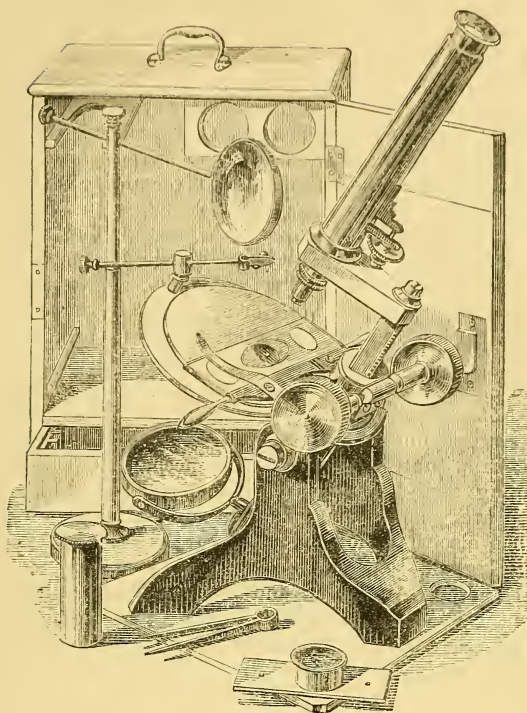

FIG. 428.

No. 3.—The “University” Microscope, Fig. 428. This instrument is of great power and definition, and suitable for all purposes of microscopic investigation. The stand is well constructed, firm, and of a new pattern; the stage is circular in form, and the object can be moved in any direction with a smooth, easy motion; the rackwork adjustment for focussing is long, and capable of taking in a 4-inch object glass. It has a fine adjustment; $\frac{1}{4}$ -inch Achromatic Object Glass, forming also $\frac{1}{2}$ -inch and 1-inch, fitted with the Universal Screw; Stand Condenser for opaque objects; Live Box; Stage, and Dissecting Forceps. The whole complete in Mahogany Cabinet £1 10 0

No. 4.—A well-constructed Microscope, all brass, made upon the same principle as the more expensive instruments, with coarse and fine adjustments, Draw Tube to body, double Mirror, removing Diaphragm, good $\frac{1}{4}$ -inch Object

£ s. d.

Glass, ditto 2-inch, No. 1 Eyepiece, Stand Condenser, Live Box, Stage, and Dissecting Forceps. Complete in Cabinet, with half a dozen interesting objects 5 5 0

This instrument is fitted with a large tube in the stage, for the convenience of fitting Polariscope or any other under illumination, without any after alteration to the Microscope, and any apparatus will fit the same without the necessity of sending the instrument back, being also universal size in the object glass screws.

No. 5.—A very useful Microscope, in construction the same as No. 6, but a size smaller, with object glasses and other extras the same. This is a very complete instrument, there being no unnecessary work or apparatus to make it expensive, the optical and mechanical arrangements being of the most convenient form, but efficient in their performance. Complete in Cabinet with large drawer 12 12 0

No. 6.—A large and substantial Microscope, constructed upon the latest improvements, with coarse and fine adjustment, draw-tube to body, double mechanical stage, with clamping and revolving slider-holder, large double mirror, with every adjustment, diaphragm, &c. This instrument has also the following apparatus:—No. 1 and 2 Eye-pieces, English $\frac{1}{4}$ Object Glass, ditto 1 and 2-inch combined, Polarizing Apparatus and Selenite, large Bull's-eye Condenser, on stand, Stage and Dissecting Forceps, Live Box, and Spot Lens. Complete in upright Cabinet, with two large drawers 20 0 0

All the above Instruments are fitted with the Universal Screw for Object Glasses.

MOUNTED OBJECTS FOR THE MICROSCOPE.

	£	s.	d.
A set of Slides (12) illustrating the growth and structure of human bone	1	4	0
Microscopic objects, including all the most interesting minute insects and parts of ditto, as legs, wings, hair, eyes, trachæ, roe, &c.; sections of wood, leaves, infusoria, shells, scales of fish, minerals, &c.; mounted on Canada balsam, and suitable for the best form of microscopes. Per slide, from 1s. 4d. to	0	2	0
Set of twelve of the above objects	0	16	0
Ditto twenty-four ditto	1	10	0
Ditto thirty-six ditto	2	9	0
Urinary deposits, consisting of specimens of oxalate of lime, lithic acid, dumb-bell lithic acid, dumb-bell oxalate of lime, carbonate of lime, spermatozoa, cystic oxide, phosphates, hippuric acid, urea, urate of soda, purpurate of ammonia.			
Set of twelve Slides, in case	1	1	0

Every other preparation from the animal, vegetable, or mineral kingdoms, for the microscope, supplied to order.

OSTEOLOGICAL PREPARATIONS.

Disarticulated Human Skeletons	£2 2s. to	5	5	0
Articulated Human Skeletons	£3 10s. to	12	12	0
Polished mahogany upright case for above		4	10	0
Disarticulated Head, the bones remounted, in situ, at distances, with sections of middle and inner ear, and preparation of the maxillary vessels and nerves. The whole, on a support, under glass shade	£9 to	13	0	0
Child's Skull, under glass shade, showing first and second dentitions	£2 10s. to	4	4	0
Skulls, with one (horizontal) section	15s. and	1	1	0
Skulls, disarticulated	£1 to	3	3	0
Skulls, with a vertical and horizontal section	17s. to	1	10	0
Skulls, in seven sections, shewing the frontal sinus, antrum, cochlea, semi-circular canals, tympanum, and small bones of the internal ear	£3 10s. to	5	5	0
Bones of the Lower Extremity, articulated, including the haunch-bone	£1 and	1	5	0
Bones of the Upper Extremity, articulated, including the scapula and clavicle	£1 1s. and	1	5	0

	£	s.	d.
Bones of the Lower Extremity, with Os innominatum, articulated in a similar manner	2	10	0
Bones of the Upper Extremity, with scapula and clavicle, so articulated as to allow of demonstration of the various dislocations	2	10	0
Set of Vertebrae, strung on cord £1 1s. and	1	5	0
Fœtal Skeletons, mounted in various ways from	2	0	0
Fœtal Skeletons, with natural ligaments, from the embryo to the full time, nine preparations, each under separate glass, the set £7 10s., £8 10s., and	10	10	0
Female pelvis, with ligaments £2 2s. and	2	5	0
Fœtal heads, each	0	6	6
Student's Set of Bones, consisting of a skull, with one (horizontal) section; the vertebral column, Os innominatum, sacrum and coccyx; sternum; one hand and one foot on catgut, and the ribs, scapula, clavicle, humerus, radius, ulna, femur, patella, tibia, and fibula of one side, £3 3s. and	3	10	0
Student's Set of Bones, consisting of a disarticulated skeleton, a skull with a horizontal and vertical section, and a disarticulated skull £4 4s. and £5 5s., £6 6s. and	7	7	0
Feet on catgut 4s. 6d., 5s. 6d., 7s. 6d., and	0	8	6
Hands on catgut 4s. 6d., 5s. 6d., 7s. 6d., and	0	8	6
Section of Head and Trunk, through spinal column, including the haunch-bone, clavicle, and scapula, and part of the humerus, mounted on a pivot, with stand for demonstration	5	0	0
Two Temporal Bones, cut in various directions, to show completely the anatomy of the internal ear	1	15	0
Leather Figure (including a natural female pelvis). with leather fœtus and placenta for obstetric demonstrations	5	5	0

MACKEY & Co.,

IMPORT AND EXPORT

CHEMISTS & DRUGGISTS,

AND

GENERAL COMMISSION MERCHANTS,

1 & 2, BOUVERIE STREET, Fleet Street, London, E.C.

All Drugs, Pharmaceutical Preparations, and Chemicals are of the best quality. •

Improved Apparatus for the Manufacture of Concentrated Essences, Infusions, Decoctions, and all new preparations which are of increased activity.

MACKEY and CO.'S Chlorodyne, 8s. per lb. Nepenthe, 8s. per lb.; Liquor Opii Sedativus, 10s.; Liquor Sennæ Dulcis, 2s. 4d.; Mist. Sennæ Co. Opt., 10d. per lb. Ol. Morrhuæ Opt., 7s. per gallon.

MACKEY and CO.'S TASTELESS PILLS of the Pharmacopœias, London Hospitals, and private formulæ, are prepared with drugs of the best quality, and covered with a soluble, pearly, inodorous coating, and can be forwarded by post. Bottles and Phials, Trusses and Surgical Instruments, of best quality, at makers' prices.

CARBOLIC ACID, CHLORIDE OF LIME, and all other Disinfectants.

AGRICULTURAL CHEMICALS.

ALL VETERINARY PREPARATIONS carefully prepared, and Ball Masses, private formulæ, and every description of Drugs, Chemicals, Instruments, Apparatus, &c., at the most moderate terms consistent with good quality.

J. B. MACKEY, Surviving Partner of the late firm of Gale and Mackey, and connected with the business thirty-seven years, continues to carry on business as a Wholesale and Export Druggist, at 1 and 2 Bouverie Street, under the style of Mackey and Co., and respectfully solicits a continuance of orders by post or otherwise.

BURGESS, WILLOWS, & WILLOWS, WHOLESALE AND EXPORT DRUGGISTS,

AND

MANUFACTURING CHEMISTS,

101, HIGH HOLBORN, LONDON, W.C.

By Special Appointment to the Royal Veterinary College,
LONDON.

Price Lists of Drugs, Chemicals, and Pharmaceutical preparations on application. Orders received direct, or through Messrs. ARNOLD and SONS.

OSBORNE, BAUER, AND CHEESEMAM

Beg to invite attention to the following specialities:—

Osborne and Company's Cosmetic Petrolin Soap, prepared with the pure Barbadoes tar. In addition to the invaluable medicinal qualities this soap possesses, it will be found far superior to other perfumed soaps for the ordinary purposes of the toilet. Its extreme mildness and excellent detergent properties render it an indispensable requisite to all who suffer from tender skin. Sold in Boxes of Three Squares, 1s. per Box.

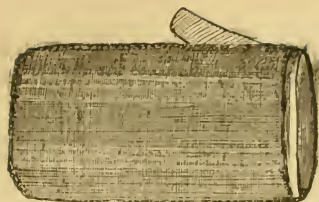

Osborne and Company's Petroleum Soap is prepared with the same ingredients as the above, but in a more concentrated form for acute cases of skin eruptions, 6d. per Tablet.

Osborne and Company's pure Oatmeal Soap—Juniper Tar Soap—Sulphur Soap—Petroleum Sulphur, 6d. per Tablet.

Osborne and Company's "Baby Soap," specially prepared for the Nursery, 6d. per Tablet.

Osborne and Company's Carbolic Acid and Tar Soap—an invaluable disinfectant, 6d. per Tablet.

OSBORNE, BAUER, AND CHEESEMAM,
WHOLESALE AND EXPORT PERFUMERS,
GOLDEN SQUARE, REGENT STREET, LONDON.

DINNEFORD'S HORSE-HAIR FLESH GLOVES, BELTS, BATH BRUSHES, OXFORD AND CAMBRIDGE PADS, &c., &c.

Highly recommended for imparting a natural vigour to the nervous system, for strengthening weak limbs, and for the prevention and relief of Gout and Rheumatism, without risk of injury to the most delicate skin. Manufactured of improved quality, and in various degrees of hardness, by the original Patentees.

DINNEFORD & Co., Pharmaceutical Chemists,
172, New Bond Street, London.

NOTICE. On and after the 1st of January, 1873, ALL BOXES issued by the Proprietors will have the Government Stamp pasted over each box instead of being on the outside wrappers as heretofore; and on each respective box and on the outside wrappers there will be printed the name and the **TRADE MARK** of the Firm, thus:—

Are **WARRANTED** not to contain a single particle of **MERCURY** or any other **MINERAL SUBSTANCE**, but to consist entirely of Medicinal Matters, **PURELY VEGETABLE**.

During the last thirty-seven years they have proved their value in thousands of instances in diseases of the Head, Chest, Bowels, Liver, and Kidneys; and in all Skin Complaints are one of the

BEST MEDICINES KNOWN.

Sold in boxes, price $7\frac{1}{2}d.$, $1s. 1\frac{1}{2}d.$, and $2s. 9d.$ each, by G. WHELPTON AND SON, 3, Crane Court, Fleet Street, London; and by all Chemists and Medicine Venders all over the world. Sent free on receipt of 8, 14, or 33 stamps, in the United Kingdom.

IMPALPABLE POWDERS OF ALL DRUGS AND CHEMICALS.

Every package branded, and each bottle with trade mark on seal.

Messrs. E., L., & E., and E., S., & Co. have carefully selected for quotation in their Monthly Price Current of Drugs, &c., those Drugs and *Materia Medica* for which their advantageous situation—commanding alike the London, Liverpool, and American markets—enables them to offer to their friends on strikingly favourable terms, and in making these quotations they have considered the need of each class of buyers.

Their uniform custom in the filling of Indents is to ship first qualities of goods, unless otherwise directed or the peculiarities of the market of destination require, and they ship either from London or Liverpool, as may be most convenient or economical to their correspondents in regard to freight, free of expense for land carriage.

Messrs. E., L., & E., or E., S., & Co. will forward their price-current regularly per monthly mail on receipt of application to that effect.

LAMPOUGH'S PYRETIC SALINE

Is found pre-eminently beneficial in preventing and curing **SMALL-POX**, by Purifying, Invigorating, and Vitalizing the Blood. Any person who has already this complaint should take it, and be kept in a cool and darkened room to prevent its leaving any trace on the features.

Sickness, Headache, and Nausea, are in most cases immediately relieved by taking a teaspoonful in a tumbler of cold water. This can be repeated once or twice in two hours if needful.

Sea Voyages.—It is a very valuable accompaniment, and should on no account be omitted; it instantly allays the sea or bilious sickness.

For Bilious Constitutions, giving rise to vitiated Secretions, Indigestion, and Eruptions of the Skin, a teaspoonful should be taken daily with the dinner, in a tumbler of water, and the same quantity on going to bed.

“RAWUL PINDEE, PUNJAB, INDIA, 28th March, 1871.

“On the recommendation of several officers, who had some of your Saline in the West Indies, all of whom speak in the highest terms of your Pyretic Saline, we were induced to try it for the first time in this Province. After use in the *fever-stricken districts* by which we are surrounded, we firmly believe that your Pyretic Saline will do more to PREVENT fever than all the Quinine ever imported can cure. We write thus strongly because both from personal experience and observation we believe we have at length found a *remedy* against the ever-present fever of these parts, which cost the *British nation* hundreds of valuable lives in Peshawur alone. We are now willing to enter into special terms for large and continued supplies, &c.”

May be obtained of the Proprietor,
H. LAMPOUGH, Consulting Chemist, 113, Holborn, E.C.
(Second door from Hatton Garden), and of all respectable Chemists.
In Bottles, 2s. 6d., 4s. 6d., 11s., and 21s.

THE MEDICAL PRESS AND CIRCULAR.

VOLUME LXVI. THIRTY-THIRD YEAR OF PUBLICATION.

This is one of the oldest and most influential of the medical journals of Great Britain. It is thoroughly impartial, and is the only one which equally represents the Schools of Medicine and Surgery in England, Ireland, and Scotland.

The translations of the most interesting medical and scientific writings from all European languages is also a special feature of this Journal.

The reduction of Subscription to 20s. per annum post free, paid in advance, renders it the *cheapest* weekly Medical Journal. It is published every Wednesday; is the only one with cut edges, and is thoroughly practical, alike to the Physician, the Surgeon, and General Practitioner.

Subscriptions for America and Canada may be paid to our recognised Agents, or direct by International Post Office order £1 6s. per annum post free (about 6½ dollars). P.O.O. to be made payable to A.A. Tindall at the London Office.

BAILLIERE, TINDALL, AND COX,
English and Foreign Medical and Scientific Publishers,
KING WILLIAM STREET, STRAND.
[PARIS & MADRID.]

THE MEDICAL TIMES AND GAZETTE

Has now for forty-two years maintained a high reputation as an independent weekly journal, devoted to the advancement and promulgation of the science and literature of medicine, and to the furtherance of the social and professional interests of medical practitioners. In the fullest sense of the phrase it claims to represent the whole Profession. It is the tool of no party, however influential; the organ of no Association, however powerful. Subservient to no private ends, it is the echo of no restricted circle, the automaton of no class interest. Its object is to reflect honestly and truly the medical opinion of the day; to give its readers the earliest information as to the advances of Medical, Surgical, and Obstetrical Science and Art, and to afford the thinkers, workers, and observers in the profession the means of laying the results of their labours before the medical world at home and abroad. Its contributors, as will be apparent on reference to its past volumes and to the appended list, are amongst the foremost in the vanguard of medical science, and it possesses, on the Continents of Europe and America, in India and the Colonies, a staff of correspondents on whom it can rely for all information of professional value. In inviting a continuance of the support which the Profession has hitherto so freely accorded to it, the Management of the MEDICAL TIMES AND GAZETTE can point proudly and confidently to its long career of professional independence, fairness and usefulness.

Each number of the MEDICAL TIMES AND GAZETTE contains one or more Original Lectures, Original Communications, Reports of the Practice at the London and Provincial Hospitals, Notes and Queries, Editorial Articles, Reviews, Biographical Notices, Selections from Foreign Journals, Letters from Correspondents in various parts of the Globe, full Information respecting the Army and Navy Services, Reports of Medical Societies, Returns of Meteorology and Vital Statistics, Notices of the newest applications of Sanitary Science, new Medicines, Articles of Diet and Medical Invention and Apparatus, the earliest and most interesting Medical News, and Correspondence on all Medical Topics, punctual answers being given to all questions of interest to the Profession.

The following Gentlemen are among the contributors for the year 1872.

- JAMES ANDREW, M.D. Oxon., F.R.C.P., Physician to St. Bartholomew's Hospital. (*Clinical Lectures.*)
- T. H. BARTLEET, M.B. Lond., F.R.C.S., Surgeon to the General Hospital, Birmingham. (*Clinical Lectures on Surgical Dressings.*)
- W. R. BASHAM, M.D. Edin., F.R.C.P., Physician to the Westminster Hospital.
- W. H. BROADBENT, M.D. Lond., F.R.C.P., Physician to St. Mary's Hospital, &c. (*A Clinical Lecture on a Case of Profuse Hæmatemesis; Clinical Contributions on Nervous and other Diseases.*)
- JOHN BEDDOE, M.D. Edin., M.R.C.P., Physician to the Bristol Royal Infirmary. (*On Civilization and Disease.*)
- J. S. BRISTOWE, M.D. Lond., F.R.C.P., Physician to St. Thomas's Hospital. (*Clinical Lectures.*)
- THOMAS BRYANT, F.R.C.S., Surgeon to Guy's Hospital. (*Clinical Lectures.*)
- F. A. BULLEY, F.R.C.S., (Hon.), Consulting-Surgeon Royal Berks Hospital, Reading. (*Papers on Medical and Surgical Subjects.*)
- C. BULTEEL, F.R.C.S., Surgeon to Royal Albert Hospital, Devonport.
- G. W. CALLENDER, F.R.C.S., Surgeon to St. Bartholomew's Hospital. (*Notes on Surgical Cases.*)
- W. CHOLMELEY, M.D., F.R.C.P., Physician to the Great Northern Hospital. (*Clinical Cases.*)
- E. CLAPTON, M.D. Lond., F.R.C.P., F.R.C.S., Physician to St. Thomas's Hospital.
- F. LE GROS CLARK, F.R.C.S., Senior-Surgeon to St. Thomas's Hospital. (*Cases in Surgery with Clinical Remarks.*)
- E. COPEMAN, M.D., M.R.C.P., Physician to the Norfolk and Norwich Hospital.
- CAMPBELL DE MORGAN, F.R.S., F.R.C.S., Surgeon to the Middlesex Hospital.
- E. WILSON DUFFIN, M.D. Edin., F.R.C.S. Edin., Assistant Physician to King's College Hospital (*Demonstrations of Skin Disease.*)
- J. MATTHEWS DUNCAN, M.D., F.R.C.P., F.R.S., Physician to the Edinburgh Royal Infirmary.
- Sir WM. FERGUSSON, Bart., Sergeant-Surgeon to the Queen.
- Professor FLOWER, F.R.S., (*Twelve Lectures on the Digestive Organs of the Mammalia.*)
- A. FLEMING, M.D. Edin., F.R.C.P., Senior Physician to the Queen's Hospital, Birmingham. (*On the Regulation of the Diet in Acute and Chronic Disease*)
- BALTHAZAR W. FOSTER, M.D., M.R.C.P., Lond., L.K.Q.C.P., Professor of the Principles and Practice of Physic in Queen's College, Birmingham. (*Clinical Lectures on Diseases of the Heart.*)
- HENRY W. FULLER, M.D. Cantab., F.R.C.P., Lond., Senior Physician to St. George's Hospital.
- J. SAMPSON GAMGEE, M.R.C.S., F.R.S. Edin., Surgeon to the Queen's Hospital, Birmingham. (*Clinical Lecture on Ingrowing Toe-nail.*)
- C. A. GORDON, C.B., Inspector-General of Hospitals.
- T. HENRY GREEN, M.D. Lond., Senior Assistant-Physician to Charing cross Hospital. (*Notes on the Pathology of Phthisis.*)
- R. GREENHALGH, M.D., St. And., M.R.C.P. Lond., Physician-Accoucheur to St. Bartholomew's Hospital. (*Obstetric and Gynecological Records.*)
- S. O. HABERSHON, M.D., Lond., Physician to Guy's Hospital. (*Clinical Observations on Chronic Jaundice.*)

CONTRIBUTORS TO THE MEDICAL TIMES AND GAZETTE,—*continued.*

- HENRY HANCOCK, F.R.C.S., Senior Surgeon at the Charing-cross Hospital. (*Lectures on Excision of the Hip-joint*)
- J. BRAXTON HICKS, M.D., Lond., Physician-Accoucheur to Guy's Hospital.
- CARSTEN HOLTHOUSE, F.R.C.S., Surgeon to the Westminster Hospital.
- HENRY G. HOWSE, M.S. Lond. M.B., Assistant-Surgeon to Guy's Hospital. (*A Year's Experience of the Antiseptic Treatment of Wounds in a Metropolitan Hospital.*)
- C. HANDFIELD JONES, F.R.S., M.B., Cantab., Physician to St. Mary's Hospital. (*Clinical Lectures and Clinical Reports.*)
- JAMES JAGO, M.D. Oxon., F.R.S., Physician to the Royal Cornwall Infirmary.
- GEORGE JOHNSON, M.D. Lond., Professor of the Principles and Practice of Medicine in King's College. (*A Paper on the Pathology and Treatment of Cholera; and occasional Clinical Lectures.*)
- FURNEAUX JORDAN, F.R.C.S., Professor of Surgery in Queen's College, Birmingham. (*On Orchitis as a Result of Congenitally Small Urinary Meatus.*)
- GEORGE LAWSON, F.R.C.S., Surgeon Royal London Ophthalmic Hospital. (*Papers on Ophthalmic Subjects.*)
- HENRY LEE, F.R.C.S. (Exam.), Surgeon to St. George's Hospital.
- F. W. LOWNDES, M.R.C.S., Honorary Assistant-Surgeon Liverpool Ladies' Charity and Lying-in Hospital. (*Suggestions towards the Proposed Amendment of the Registration Acts; and various Contributions on Medical Subjects.*)
- E. LUND, F.R.C.S. Surgeon to the Manchester Royal Infirmary. (*Occasional Cases in Hospital Practice.*)
- S. MARTYN, M.D. Edin. F.R.C.P. Lond. Senior Physician to the Bristol General Hospital. (*Clinical Lectures.*)

CHLORODYNE,

DR. J. COLLIS BROWNE'S.
SPECIAL NOTICE.

The absurd statements that have recently appeared in Medical and other Journals respecting the constituents of CHLORODYNE (each analysis differing widely), J. T. DAVENPORT is compelled to further caution the Profession against using any Compound under the name of Chlorodyne but the genuine, which alone has gained such extraordinary celebrity.

J. T. DAVENPORT appends Medical Testimony in confirmation of the above.

The wonderful efficacy of Chlorodyne being universally acknowledged, it must be evident to all that the assumption of the name to any other Compound than the Genuine is not only dishonest in obtaining money under false pretences, but still more unprincipled by injuring the health of the Patient and causing discredit to the Physician. Even death has resulted from the use of spurious Chlorodyne when benefit had been previously experienced from the genuine; and this melancholy circumstance has no effect in restraining these heartless proceedings.

From Dr. J. Wilson, Castleton, Yorkshire.

"I require to use a considerable quantity of Chlorodyne in cases where no other medicine is of the least avail; and my object in wishing a supply from your own establishment is, that I am frequently deceived by getting a SPURIOUS article from other places, although I never order anything but the genuine Browne's Chlorodyne."

From J. Atkin, M.D., Medical Officer, Fever Hospital, Oldcastle, Co. Meath.

"Having ordered from our Druggists 'Chlorodyne' I was not only DISAPPOINTED IN ITS EFFECTS, but annoyed when I received a spurious compound. I have been in the habit of using your Chlorodyne with great advantage to my patients and satisfaction to myself."

VICE-CHANCELLOR SIR W. P. WOOD stated:—Dr. J. Collis Browne "was undoubtedly the Inventor of CHLORODYNE." "I believe the whole story of the Defendant Freeman to be as deliberately untrue as the falsehood he has deposed to with reference to the use of his Chlorodyne in the Hospitals."

Sold in Bottles at 1s. 1½d., 2s. 9d., and 4s. 6d. Sole Manufacturer,

THE BRITISH MEDICAL JOURNAL FOR 1872

Has already contained Dr. Bristowe's Croonian Lectures at the Royal College of Physicians; Dr. Habershaw's Lettsonian Lectures at the Medical Society of London; part of a series of Lectures on the Practice of Medicine, by Dr. Murchison, F.R.S.; a series of Clinical Lectures by Sir James Paget, Bart., F.R.S.; and Lectures by Drs. Aitken (Netley), Ferrier, Fuller, George Johnson, Latham (Cambridge), Playfair, Protheroe Smith, and Stokes (Dublin), and Messrs. Annandale (Edinburgh), Callender, De Morgan, Erichsen, Prescott, Hewett, Spencer Smith, W. Stokes (Dublin), John Wood, &c.

COURSES OF LECTURES by Sir W. Jenner, Bart, F.R.S.; Sir William O. Gull, Bart, F.R.S.; Drs. Fraser (Edinburgh), Humphrey, Morell Mackenzie, and others, will appear in the forthcoming volumes.

Among the more important papers which have appeared during 1872 are communications from Sir James Alderson, Sir W. Gull, Bart.; Drs. Clifford Allbutt (Leeds), Ford Anderson, Athill (Dublin), Aveling, Bastian, Broadbent, Brunton, Christie (Zanzibar), Lockhart, Clarke, Clouston (Carlisle), Gairdner (Glasgow), Grimshaw (Dublin), Haughton (Dublin), Heaton (Leeds), Braxton Hicks, Holmes, Hughlings, Jackson, Mariet, Maudsley, Morton (Glasgow), Moxon, Douglas Powell, Russell, Reynolds, Seegen (Vienna), Shapter (Exeter), Stromeyer (Hanover), Waters (Liverpool), Wilks, Wolfe (Glasgow); and Messrs. H. Arnott, Le Gros Clarke, Dalrymple, M.P.; Gascoyn, Ernest Hart, Hairland, Berkeley Hill, Jonathan Hutchinson, Funeaux Jordan (Birmingham), Rivington, &c.

SPECIAL REPORTS have appeared in the Journal on the Purification of Drinking Waters, on the action of Various Filters, and on the Milk supplied to Hospitals.

NOW PUBLISHING: Reports on Sanitary Appliances, Drainage and Sanitary Engineering of Houses, Hospitals, and Asylums; Professor Humphrey's Lectures on Human Myology, at the Royal College of Surgeons, &c.

BRITISH MEDICAL JOURNAL,

Edited by ERNEST HART, Esq.,

Is the most powerful medium of medical opinion, and is by far the most widely circulated. It is the organ of the British Medical Association which numbers nearly 5,000 members in the United Kingdom, Ireland and the Colonies, and is yearly increasing. They are a most influential class, a large proportion of them holding public appointments.

The Journal is taken by nearly every hospital surgeon and physician, poor law medical officer, and public health officer, in the Kingdom, in garrison libraries, public offices, clubs and most reading-rooms.

It has a department devoted to the description, with figures of new inventions in medicine, surgery, chemistry, dietetics, microscopy, hygiene, and the arts allied to medicine.

The British Medical Journal takes rank as the leading medical journal, and from its wide circulation among the most influential classes is a highly valuable medicine for advertisers.

Price 5d.; yearly subscription, £1 1s.

L. CASELLA'S

New Patent Safety Self-Registering Clinical Thermometer

Has an arrangement which prevents the possibility of its being put out of order by the index or register being lost in the bulb, and is guaranteed not to become disarranged by any amount of violence, whether in the hands of the physician or most inexperienced person.

The instructions for use are the same as accompany his other registering medical thermometers, except that no care whatever to prevent disarrangement is required.

The sizes are 4 and 6 inches respectively, in neat lined pocket case. Silver or ivory cases if required.

For rough usage, taking or sending abroad, or leaving to be used by the patient, the value of the Patent Safety Thermometer cannot be over-estimated. Price 2s. 6d. each extra.

The Improved Portable Spirometer, in neat mahogany case, $6\frac{3}{4} \times 3\frac{3}{4}$ inches, is just completed. £4 10s.

Medical Coils and Electro-Galvanic Machines, with all the latest improvements.

Microscopes, Scientific Instruments, &c., for Travellers.

147, HOLBORN BARS; late 23, Hatton Garden.

PURE CHEMICALS & NEW MEDICINES.

T. MORSON & SON,

31, 33 & 124, SOUTHAMPTON ROW, RUSSELL SQUARE, LONDON ;
CHEMICAL WORKS, HORNSEY ROAD; AND SOMERFIELD WORKS, HOMERTON.

Supply PURE CHEMICALS and all NEW MEDICINAL PREPARATIONS,

Including the following Specialities:—

PEPSINE, the active digestive principle of the gastric juice; an agreeable and popular remedy for weak digestion. In POWDER, WINE, LOZENGES, and GLOBULES.

PANCREATIC EMULSION AND PANCREATINE, in Powder; containing the active principle obtained from the Pancreas, by which the digestion and assimilation of fat is effected.

PANCREATISED COD LIVER OIL. In Half-pints and in Quart Tins.

CHLORAL HYDRATE CAKE AND CRYSTALS (NEW SEDATIVE).

CHLORODYNE (MORSON'S), the universally approved Anodyne. In 2-oz., 4-oz., and 8-oz. bottles.

CHLOROFORM, METHYLATED AND PURE.

CREOSOTE—(CAUTION)—from Wood Tar, of which T. M. & SON are the only British Manufacturers.

To test a suspected sample, mix it with an equal quantity of pure Glycerine. If they unite and make a clear solution, the substance is carbolic acid, or in greater part consists of it.

GELATINE, a perfect and economical substitute for Isinglass.

SHIPPING ORDERS EXECUTED WITH CARE AND DESPATCH.

SILVER MEDAL AWARDED PARIS EXHIBITION, 1867: JUROR, 1869.

DEAN AND SON, 65, LUDGATE HILL, E.C.

THE DOCTOR:

A MONTHLY REVIEW OF BRITISH AND FOREIGN MEDICAL PRACTICE AND LITERATURE.

The object of THE DOCTOR is to present, in the smallest possible compass, an Epitome of the Practice and Literature of the profession at home and abroad.

THE DOCTOR does not rival other Journals. Rather it supplements their usefulness by analysing, condensing, and criticising their most important contents, and so serving as an Index to British and Foreign Medical Science and Practice.

THE DOCTOR is the natural medium of intercommunication between the medical profession and the educated public.

The Doctor has been described as—

“The pith of the periodicals at home and abroad.”

“The best epitome of Medical literature extant.”

“The public opinion of the Medical Profession.”

“A boon to every practitioner, as it contains in a few well-arranged pages all that is necessary to keep any one *au courant* with the progress of Medical science and literature.”

“A complete review of Medical practice and literature in all countries.”

The Doctor, therefore, does not rival other journals, but is the natural Supplement to each, and its low price places it within the reach of every Medical man.

The circulation of the Doctor during the year 1871 equalled that of any of the Medical weeklies, and every new number brings new subscribers. The Doctor has been mentioned with approval, and its articles are regularly quoted by the leading journals of Europe and America.

Post-office orders or cheques to be made payable to Baillière, Tindall, and Cox, 20 King William street, Strand, London, W. C. Where it is difficult to obtain a Post office order, postage stamps (HALF-PENNY ones preferred) may be sent. No form of subscription is necessary, an ordinary visiting card or name and address on paper, enclosed with the amount of subscription, will secure the regular transmission of the Doctor as soon as published. The Subscription for the year is 6s. Post Free in the United Kingdom.

In America, France, Belgium, Algiers, Australia, and whenever the postage is one penny the subscription is 7s.; India, Spain, Germany, and where the postage is twopence the subscription is 8s.; Italy, and where the postage is threepence, 9s.

Now Ready, price 3s. 6d., cloth.

CURACOA, MARASCHINO, NOYAU.....		9s.	per Bottle.		

A Full List of Liqueurs can be had on application.

NOTES AND REMARKS.

CASES, if not returned to us, are charged at 2s. per dozen. We cannot be answerable for cases returned if the original direction cards are removed or defaced. The railway charge must be prepaid on all "RETURNS," or the cases are now not sent forward by the railway companies.

BOTTLES. We allow for our own Bottles (with C. W. S. in punt) 1s. per dozen, and 6d. per dozen for ordinary bottles, which are useless to us, as we do not bottle in them.

PACKAGES. *Stone bottles*, covered with basket work, are charged at 1s. 6d a Gallon.—7 Gall. Drums and Cases, 10s. Adamas tap, 1s. 6d.—Qr. Casks, 10s. If any of these packages are returned to be re-filled no charge is made, and when finally returned (in good order) we allow 1s. 3d. per gallon for the stone bottles, 8s. 4d. for drum and case, and 8s. 4d. for a Quarter Cask.

CARRIAGE. We pay carriage to any railway station in England *on even a single dozen*. If charged a second time by the railway officials, on receipt of the carriage note we will recover and remit the amount.

SAVORY AND MOORE'S SPECIAL PREPARATIONS

and Appliances in aid of Medicine and Surgery.

EUCALYPTUS GLOBULUS, or **Fever Tree**. Preparations—Tincture, Fluid Extract, Solid Extract, Powder, and Essential Oil.

“Employed with success in Intermittent Fever, Bronchitis, Asthma, &c., and strongly recommended as a Tonic and Stimulant.”—*Vide THE LANCET*, April 20th, 1872, page 557.

LACTO-PHOSPHATE OF LIME. } **WINE** and **SYRUP.**
LACTO-PHOSPHATE OF IRON. }

N.B.—The Syrups are more concentrated than Dr. Dusart's, and the patient consequently takes *considerably less sugar* in a dose.

GENUINE PANCREATIC EMULSION, as originally prepared by them, and the only kind recognised by the Medical Profession.

THE BEST FOOD FOR INFANTS. Used in the Nurseries of the Royal Families of England and Russia.

PURE PANCREATINE effects the digestion and assimilation of Cod-liver Oil and fatty substances generally.

PANCREATINE POWDER, PILLS, and WINE, and PANCREATIC COCOA.

PANCREATISED (DIGESTIVE) COD-LIVER OIL. The labels give directions for producing a Pancreatic Emulsion, and a test for the digestive principle.

ETHERODYNE. SUPERIOR TO CHLORODYNE.

A perfectly clear, bright fluid, readily miscible with water, &c.

KHEESAH, OR IMPROVED FRICTION GLOVES AND BELT. For promoting a healthy and agreeable action of the skin.

DATULA TATULA, for inhalation in Asthma, Bronchitis, &c. Cigars and Cigarettes, Pastilles, and in the form for use by means of the REGISTERED MEDICAL PIPES, invented by JAMES BIRD, Esq., by which the amount of smoke and air inhaled may be regulated.

THE DISINFECTING VAPORIZER (PATENT). For Disinfecting and Purifying the air of Rooms and Articles of Clothing, Bedding, Furniture, &c., during and after small-pox, fevers, &c.; also preventing infectious diseases.

SAVORY AND MOORE,
143, NEW BOND STREET, LONDON.
